Catchy Names For Training Programs:

Squaring Up Mary Carolyn King,2025-12-10 Despite three decades of progress American women's incomes still average just over half of those of men. This income gap is both a cause and a symptom of gender inequity. The gap means that women are only half as able as men to support themselves and their families are too often mired in poverty and have less power than men do in their families communities and governments. In this book economists present readable informative and compelling assessments of several policy strategies capable of bringing down the barriers to economic equality for women and men. More specifically Squaring Up discusses the potential of ten different strategies to raise women's incomes. These strategies fall into three categories those intended to reduce the negative impact of childrearing on women's incomes those designed to raise the wages in the jobs where most working women are concentrated and those focused on moving women into better paying positions. The chapters on each policy strategy represent both a state of the art assessment of the potential of each strategy to raise American women's incomes and an introduction to the topic that includes information on current programs and directs the reader to the most important literature on the topic. The policies considered constitute a pluralist agenda for women one that can be supported by people across the American political spectrum as it calls for support for stay at home mothers poor women women in stereotypical women's jobs women in non traditional employment high powered women executives and older women. This book features contributions from many of the best economists working on issues of relevance to women today including Nancy Folbre recent recipient of a MacArthur genius fellowship and Barbara Bergmann previous president of the International Association for Feminist Economics and author of The Economic Emergence of Women. Squaring Up is designed for courses in a wide range of disciplines including public policy political science economics sociology and women's studies. It is also intended for policy makers opinion leaders activists and the general public interested in women's issues.

Bait and Switch Julie A. Mertus,2008-02-19 It has become routine for the US government to invoke human rights to justify its foreign policy decisions and military ventures. But this human rights talk has not been supported by a human rights walk. Policy makers consistently apply a double standard for human rights norms one the rest of the world must observe but which the US can safely ignore. Based on extensive interviews with leading foreign policy makers military officials and human rights advocates Mertus tells the story of how America's attempts to promote human rights abroad have paradoxically
