Brendan G. Carr

Habit Building Planner Primer:

Advancements in Sustainable Architecture and Energy Efficiency González-Lezcano, Roberto A., 2021-06-18 Thermal comfort and indoor air quality IAQ issues have gained significant interest in the scientific and technical community involved in building performance analysis and other related subjects In terms of thermal comfort the achievement and maintenance of a thermally acceptable indoor environment is affected by energy costs and energy poverty is a widespread problem globally There is a call for energy efficient architecture for a developed and sustainable world However with the use of renewable energy that increased considerably in recent years new technical challenges arose for the energy sector Consumers are key players in this context as flexibility in demand is crucial to cope with the intermittent nature of most renewable energy sources Active demand side participation is particularly important to ensure the efficient use of locally and globally available energy Sustainability human comfort and healthy living environments have become top priorities Advancements in Sustainable Architecture and Energy Efficiency explores how housing is a key health factor for individuals and looks at factors such as air quality ventilation hygrothermal comfort lighting physical environment building efficiency and other areas as important pieces in healthy architecture It discusses how the poor application of these parameters can directly affect human health and how sustainable architecture provides a solution Beyond just labeling the important facets of architecture for healthy living this book will look at different perspectives of energy consumption and demand to ensure sustainable energy increased energy efficiency improved energy policies and reasonable energy costs for homes This book is ideal for architects designers engineers energy engineers environmental scientists practitioners researchers academicians and students interested in architecture that is both conducive to healthy living and energy efficiency *Preparing Early Career Teachers to Thrive* Kristina Marie Valtierra, 2024 Teachers are the backbone of schools yet they are leaving in droves This book addresses the post pandemic crisis of early career teacher turnover that is harming students and entire school systems The author provides teacher educators and mentors with strategies to help new teachers proactively navigate the early years and thrive in the K 12 classroom Based on 10 years of research and practical application this guide will support teacher professional identity formation resilience and agency With a humanistic conceptual lens on the most pressing issues expressed by novice teachers chapters cover understanding the causes of burnout and attrition promoting an authentic teacher identity appreciating teaching as developmental managing tension and conflict self care for busy educators and authoring a personalized early career plan Each topic features assignment ideas reflection prompts and other tools suitable for both teacher preparation courses and one on one coaching and mentoring Book Features Offers field tested tools to help preservice and new teachers avoid burnout and maintain their well being Includes step by step activities with templates that break down each of the tools discussed Weaves together inspiring quotes short anecdotes and work samples from teachers who participated in the activities Recommends distinct ways that K 12 induction programs mentors administrators and early

career teachers can use and adapt the ideas presented Valtierra is a beacon of hope offering practical strategies and compelling insights to empower educators at the onset of their journey Tina H Boogren bestselling author and educational consultant Design for Ecological Democracy Randolph T. Hester, Jr.,2010-09-24 Shows how to combine the forces of ecological science and participatory democracy to design urban landscapes that enable us to act as communities are resilient rather than imperiled and touch our hearts Over the last fifty years the process of community building has been lost in the process of city building City and suburban design divides us from others in our communities destroys natural habitats and fails to provide a joyful context for our lives In Design for Ecological Democracy Randolph Hester proposes a remedy for our urban anomie He outlines new principles for urban design that will allow us to forge connections with our fellow citizens and our natural environment He demonstrates these principles with abundantly illustrated examples drawn from forty years of design and planning practice showing how we can design cities that are ecologically resilient that enhance community and that give us pleasure Hester argues that it is only by combining the powerful forces of ecology and democracy that the needed revolution in design will take place Democracy bestows freedom ecology creates responsible freedom by explaining our interconnectedness with all creatures Hester s new design principles are founded on three fundamental issues that integrate democracy and ecology enabling form resilient form and impelling form Urban design must enable us to be communities rather than zoning segregated enclaves and to function as informed democracies A simple bench at a centrally located post office for example provides an opportunity for connection and shared experience Cities must be ecologically resilient rather than ecologically imperiled adaptable to the surrounding ecology rather than dependent on technological fixes Resilient form turns increased urban density for example into an advantage And cities should impel us by joy rather than compel us by fear good cities enrich us rather than limit us Design for Ecological Democracy is essential reading for designers planners environmentalists community activists and anyone else who wants to improve a local community
