Cat 924k Manual:

Remediation Manual for Contaminated Sites David L. Russell, 2024-08-26 Based on the author's more than 40 years of experience working on environmental projects Remediation Manual for Contaminated Sites provides a practical guide to environmental remediation and cleanups. It presents a broad overview of the environmental remediation process distilled into what one needs to know to evaluate a specific challenge or solve a remediation problem. The text offers guidance on tasks that range from managing consultants and contractors to gathering data, selecting a suitable remediation technology, and calculating remediation costs. This new edition is updated throughout, includes five new chapters, and provides a more global coverage. This book includes remediation strategies for a variety of contaminants and examines a wide range of technologies for the remediation of water and soil, including excavation, wells, drainage, soil venting, vapor stripping, incineration, bioremediation, containment, solidification, vitrification, and phytoremediation. Written as a down-to-earth reference for professionals faced with the challenges of remediating a contaminated site, this book is also useful as a primer for students and those new to the field. It includes numerous figures, photographs, tables, and helpful checklists. This new edition adds five all-new chapters. It presents a more global approach and practical examples from around the world. Accessions List, South Asia Library of Congress.
