material that was necessary for us to have further success This resulted in us needing to buy yet another course which consisted of manuals tapes videos workbooks and CD ROM s at hundreds of dollars to get a little more information In no time at all we had bought a succession of courses just to get the rest of the information we needed to have some success at commodity trading With this in mind here is the information that many of the courses left out Please note that charts contained in this book are exclusively from Gecko Software We have found Gecko Software to be one of the best charting companies out there with the use of some great tools indicators and past data readily available Some charts are from the distant past and some are more current However all the charts provide enduring examples and are everlasting
