Computer Tools For The Engineer And Scientist:

Computer Tools for the Engineer and Scientist Richard W. Campbell, 2015-12-28 The working engineer or scientist rarely writes complex applications or extensive computer code For many disciplines learning a specific computer language is unnecessary However the engineer and scientist must be conversant in a variety of computer tools in order to select the best tool for the task at hand This workbook assumes that the reader already has the mathematical and programming skills to do the exercises A common theme is to present the same problem in different formats to learn how each of the three tools is used for the same solution Two of the most common computer tools used in industry and research are MATLAB and Mathcad Both have unique user interfaces and very different ways of doing the same thing MATLAB is an ideal tool for teaching programming and creating solutions to solve specialized problems Mathcad with its graphical user interface is particularly well suited to solving mathematical equations and preparing written reports which must contain extensive analysis Both have their place in industry The use and programming of the TI 89 handheld calculator is also included This calculator enjoys widespread use because of the mathematical capabilities including matrix algebra and the ability to be programmed with structured programming techniques
