Food Fortification in a Globalized World M.G. Venkatesh Mannar, Richard F. Hurrell, 2018-06-29

The book captures recent science and applications trends in fortification, including emerging areas such as biofortification, nutraceuticals, and new nutrient intake recommendations, standards, policy, and regulation. The book proposes a balanced and effective food fortification strategy for nations to adopt. In covering the most technical scientific details in an approachable style, this work is accessible to a range of practitioners in industry, government, NGOs, academia, and research. Food fortification has become an increasingly significant strategy to address gaps in micronutrient intakes in populations with measurable impact in both industrialized and developing countries. Presents the latest science on fortification for the prevention of micronutrient deficiencies.
