## **Readers Choice Children Bedtime Story:**

*Children's Reading Choices* Martin Coles, Christine Hall, 2002-01-04 Children's Reading Choices discusses the reading habits of children aged between 10 and 14. The book reports the findings of the Children's Reading Choices project conducted by the authors from the University of Nottingham and the largest national survey of children's reading choices since the 1970s. The book includes reports and discussion on girls and boys reading preferences and the differences between their reading habits, the place of series books, teenage magazines and comics in children's reading, the most popular authors and titles at different ages, purchasing habits and library use. **Reader's Choice** Kim Flachmann, Michael Flachmann, Alexandra MacLennan, 2006 **Young People Reading** Evelyn Arizpe, Gabrielle Cliff Hodges, 2018-03-19 The value of small scale qualitative research projects into young people's reading is often underestimated. Yet these finely tuned studies with a precise focus and highly specialised approach can provide us with profound insights into the richness and variety of young people's reading practices. Bringing together contributors from six continents, this fascinating volume explores researchers' experiences of investigating the reading habits, preferences and practices of young people aged 12-21. Detailing a variety of empirical methodologies and research methods, its chapters also consider reading in an array of contexts in various languages and using diverse media. Key issues addressed in the book include the complexity of sociocultural similarities and differences in young people's reading in international contexts, multilingual, bilingual and monolingual readers' experiences of reading, how young readers use a range of different print and digital media, how our understanding of the range of texts available to young readers and the different contexts of and purposes for reading can be enhanced through small scale qualitative research. Providing in depth discussion of contributors' research and findings and touching on many different contexts, text types and media, this volume will support and inspire current and future researchers, lecturers and teachers interested in young people's reading. Teaching Modern Languages to Young Learners Marianne Nikolov, European Centre for Modern Languages, 2007-01-01 This book is targeted at modern languages teachers of primary school children and focuses on curricula and syllabi as well as on teaching materials and methodology. The papers look into issues related to both pre and in service teacher education, innovative curriculum and syllabus design in tertiary education and lower primary schools and how new ideas can be implemented at national and classroom levels. The first six papers focus on teacher education, curricula and teacher development in pre service and in service programs, whereas the last four papers examine curricula, teaching materials and projects in primary schools.
