Ordinary Cities Jennifer Robinson, 2013-07-04 With the urbanization of the world s population proceeding apace and the equally rapid urbanization of poverty urban theory has an urgent challenge to meet if it is to remain relevant to the majority of cities and their populations many of which are outside the West This groundbreaking book establishes a new framework for urban development It makes the argument that all cities are best understood as ordinary and crosses the longstanding divide in urban scholarship and urban policy between Western and other cities especially those labelled Third World It considers the two framing axes of urban modernity and development and argues that if cities are to be imagined in

equitable and creative ways urban theory must overcome these axes with their Western bias and that resources must become at least as cosmopolitan as cities themselves Tracking paths across previously separate literatures and debates this innovative book a postcolonial critique of urban studies traces the outlines of a cosmopolitan approach to cities drawing on evidence from Rio Johannesburg Lusaka and Kuala Lumpur Key urban scholars and debates from Simmel Benjamin and the Chicago School to Global and World Cities theories are explored together with anthropological and developmentalist accounts of poorer cities Offering an alternative approach Ordinary Cities skilfully brings together theories of urban development for students and researchers of urban studies geography and development

George Gissing, the Working Woman, and Urban Culture Emma Liggins, 2017-09-29 George Gissing's work reflects his observations of fin de siècle London life Influenced by the French naturalist school his realist representations of urban culture testify to the significance of the city for the development of new class and gender identities particularly for women Liggins's study which considers standard texts such as *The Odd Women* *New Grub Street* and *The Nether World* as well as lesser known short works examines Gissing's fiction in relation to the formation of these new identities focusing specifically on debates about the working woman From the 1880s onward a new genre of urban fiction increasingly focused on work as a key aspect of the modern woman's identity elements of which were developed in the New Woman fiction of the 1890s Showing his fascination with the working woman and her narrative potential Gissing portrays women from a wide variety of occupations ranging from factory girls actresses prostitutes and shop girls to writers teachers clerks and musicians Liggins argues that by placing the working woman at the center of his narratives rather than at the margins Gissing made an important contribution to the development of urban fiction which increasingly reflected current debates about women's presence in the city
