*A Parent's Guide to Autism Diagnosis* Adele Devine, Sophia Mooncey, 2021-11-18 Autism diagnosis can be an overwhelming time for many families. This is an accessible, easy to navigate guide for parents answering the questions they may have before, during, and after diagnosis. Written by a highly experienced author team, this book will support parents from the moment somebody mentions autism through the diagnosis process and beyond. It provides reliable advice on every stage with guidance on what to do during the long wait for assessment and diagnosis. Working from a pro neurodiversity perspective, it encourages parents to see beyond the diagnosis and to celebrate each child's unique personality and strengths. Combining information on medical diagnosis, educational needs, and more, the book shares case studies and direct quotes from families to help parents to give their children the best start following an autism diagnosis and help them to achieve their full potential. There is also a bonus downloadable chapter with information from the key professionals involved in the diagnostic process so you know who you can turn to for the support and help you need.

## **Theoretical Models and Processes of Literacy** Misty Sailors, Donna E. Alvermann, 2018-10-03

The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research broadly defined and features both cutting edge and classic contributions from top scholars. Two decades into the 21st century, the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways: the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era; the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes; and most notably, contemporary literacy models and processes enhance and extend earlier theories of reading and writing. Providing a tapestry of models and theories that have informed literacy research and instruction over the years, this volume's strong historical grounding serves as a springboard from which new perspectives are presented. The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution. This edition is a landmark volume in which dynamic dialogic and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them. Some additional archival essays from previous editions are available on the book's eResource. New to the Seventh Edition: Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts. New chapters reflect sweeping changes in how readers and writers communicate in a digital era. Slimmer volume is complemented by some chapters from previous editions available online.

[Social Progress](#), 1919 [Macro Cultural Psychology](#) Carl Ratner, 2012

This book articulates a bold new systematic theory of psychology, culture, and their interrelation. It explains how macro cultural factors, social institutions, cultural artifacts, and cultural concepts are the cornerstones of society and how they form the origins and characteristics of psychological phenomena. This theory is used to explain the diversity of psychological

phenomena such as emotions self intelligence sexuality memory reasoning perception developmental processes and mental illness Ratner draws upon Lev Vygotsky's sociocultural psychology Bronfenbrenner's ecological psychology as well as work in sociology anthropology history and geography to explore the political implications and assumptions of psychological theories regarding social policy and reform The theory outlined here addresses current theoretical and political issues such as agency realism objectivity subjectivism structuralism postmodernism and multiculturalism In this sense the book articulates a systematic political philosophy of mind to examine numerous approaches to psychology including indigenous psychology cross cultural psychology activity theory discourse analysis mainstream psychology and evolutionary psychology

**The Drinking Curriculum** Elizabeth Marshall,2024-01-02 A lively exploration into America's preoccupation with childhood innocence and its corruption In The Drinking Curriculum Elizabeth Marshall brings the taboo topic of alcohol and childhood into the limelight Marshall coins the term the drinking curriculum to describe how a paradoxical set of cultural lessons about childhood are fueled by adult anxieties and preoccupations By analyzing popular and widely accessible texts in visual culture temperance tracts cartoons film advertisements and public service announcements Marshall demonstrates how youth are targets of mixed messages about intoxication Those messages range from the overtly violent to the humorous the moralistic to the profane Offering a critical and at times irreverent analysis of dominant protectionist paradigms that sanctify childhood as implicitly innocent The Drinking Curriculum centers the graphic narratives our culture uses to teach about alcohol the roots of these pictorial tales in the nineteenth century and the discursive hangover we nurse into the twenty first
