Electrochromic Materials and Devices Roger J. Mortimer, David R. Rosseinsky, Paul M. S. Monk, 2015-07-27 Electrochromic materials can change their properties under the influence of an electrical voltage or current Different classes of materials show this behavior such as transition metal oxides conjugated polymers metal coordinated complexes and organic molecules As the color change is persistent the electric field needs only to be applied to initiate the switching allowing for applications such as low energy consumption displays light adapting mirrors in the automobile industry and smart windows for which the amount of transmitted light and heat can be controlled The first part of this book describes the
