Pedagogical Opportunities of the Review Genre Maarit Jaakkola, 2024-06-28 *Pedagogical Opportunities of the Review Genre* unleashes the pedagogical potential of the review genre reframing the act of reviewing of cultural products as a communicative practice from a pedagogical perspective. Negotiating between traditions of journalism and media studies and pedagogy the author presents a novel approach that will increase the readers understanding of an activity that is on the increase in an era where everyone can be a critic. She identifies, describes and develops genre based pedagogies in formal, non formal and informal contexts of learning and teaching in order to recontextualize the review as a form of learning and rethink of its potential as an inclusive, engaging and a transformative critical cultural practice. This innovative and truly interdisciplinary study will interest students and researchers in the areas of media literacy, digital media, media and communication studies, cultural studies, sociology of arts and pedagogical studies, in particular cultural journalism and criticism, audience studies, cultural production and cultural mediation as well as critical media pedagogy and literacy studies.

Multiliteracies in International Educational Contexts Gabriela C. Zapata, Mary Kalantzis, Bill Cope, 2023-12-22 *Multiliteracies in International Educational Contexts* Towards Education Justice examines how multiliteracies and Learning by Design have been taken up across international second language instructional contexts with a focus on inclusive practices and social justice. This edited collection brings together a team of international contributors to offer a global perspective on the application of multiliteracies in L2 education. Through the analysis of classroom based qualitative and quantitative data on different aspects of the multiliteracies pedagogy the book shows how the multiliteracies pedagogy can facilitate more inclusive practices while providing suggestions for pedagogical interventions and future research. This book will be a key resource for language educators, researchers and practitioners interested in the multiliteracies pedagogy as well as those interested in critical and social justice approaches to language teaching.

Intelligent recommendations help users to cope with the steadily growing information overload within the internet or when using information systems at their place of work for instance. As an example the recommendation techniques collaborative filtering and content based filtering are mainly applied in the areas of e-Commerce and web navigation to recommend potentially relevant articles or websites. Recommender systems are either based on machine learning functions such as clustering, classification and prediction or they are realized by symbolic methods like association rule mining that is by rule based mechanisms in general. The hybrid and domain independent framework developed in this

dissertation called SymboConn is based on a recurrent neural network and provides a high generalization capability flexibility and robustness We demonstrate its applicability by case studies in navigation recommendation design pattern discovery change impact analysis as well as time series prediction
