**26.2 Sound in Air (pages 515–517)**

- Is the following sentence true or false? Sound vibrates the air much like particles move back and forth along a stretched spring. true
- A pulse of compressed air is called a compression, and a pulse of low-pressure air is called a rarefaction.
- For all wave motion, it is not the medium that travels, but a pulse that travels.
- Explain what happens when a tuning fork is struck against one end of an open tube.  
When the prong is struck, a compression enters the tube. When the prong swings away, a rarefaction follows the compression. A series of compressions and rarefactions is produced within the tube as the fork continues to vibrate.

**26.3 Media That Transmit Sound (page 517)**

- What did Native Americans learn long ago when they put their ears to the ground?  
They could hear the hoofbeats of distant horses through the ground before they could hear them through the air.
