Rodríguez Domínguez, Swagatam Das, 2025-12-16 This book presents best selected research papers presented at the Sixth International Conference on Recent Trends in Communication and Intelligent Systems ICRT CIS 2025 organized by Arya College of Engineering and IT Jaipur on June 27 28 2025 It discusses the latest technologies in communication and intelligent systems covering various areas of communication engineering such as signal processing VLSI design embedded systems wireless communications and electronics and communications in general Featuring work by leading researchers and technocrats the book serves as a valuable reference resource for young researchers and academics as well as practitioners in industry

Managing the Smart Revolution in Travel, Tourism, and Hospitality Anukrati Sharma, Shruti Arora, Priya Sodani, 2025-11-17 Managing the Smart Revolution in Travel Tourism and Hospitality provides a comprehensive exploration of how cutting edge technologies are reshaping the landscape of the industry

Why Irrational Politics Appeals Mari Fitzduff, 2017-02-13 The 2016 election has inspired millions of U S citizens and struck panic in the hearts of millions more This book explains the allure of Trump examines how Trump's success ties into the hopes and fears of many Americans and calls into question the limitations of our democratic system Across the United States and around the world people are struggling to understand why so many turned to Donald Trump an individual described as rude and insensitive at best and as

racist hateful and ignorant at worst as their champion Trump's nomination as the Republican presidential candidate and his subsequent election to president of the United States upended many long held assumptions and beliefs about politics such as the inevitable power of super funding election syndicates and the need for presidential candidates to have governance experience and broad knowledge of domestic and foreign affairs. *Why Irrational Politics Appeals: Understanding the Allure of Trump* takes a serious scientific look at Trump and his politics against the backdrop of modern American society. It brings together experts from a variety of psychological and political science fields to answer the mystifying question of why people by the millions would follow a leader who to so many others seems unqualified, undiplomatic and in opposition to previously established standards for a national leader. Readers will gain an understanding of how little a role rationality plays in political choices particularly but not always among citizens of certain socioeconomic backgrounds and why Trump's apparently divisive attitudes and prejudices, his lack of political correctness and his hubris appeal to so many voters. The book also raises questions about our democratic processes and our need for more thoughtful political cultures to ensure that citizens are adequately prepared to make important leadership decisions that will affect the future of our nation's economy, social norms and global safety.

[Disinformation Countermeasures and Artificial Intelligence](#) Oleksandr Makarenko, Paul Vines, George Cybenko, Ludmilla Huntsman, 2025-12-20 The Disinformation Countermeasures and Artificial Intelligence topic collection in *Frontiers in Artificial Intelligence* and *Frontiers in Big Data* journals will address the core problems of Cognitive Security CogSec AI powered disinformation in cognitive warfare machine learning techniques to counter disinformation novel P3 public private partnership models for countering synthetic disinformation and cross disciplinary methods of building cognitive resilience to malign influence operations with the use of AI. Artificial intelligence is changing the way we create and evaluate information and this is happening during an infodemic while all governments and their citizens face the important challenge of disinformation affecting politics, public health e.g. COVID 19, financial markets and elections. Although the impact of disinformation is intrinsically difficult to quantify and prone to overestimation in the popular consciousness specific examples such as lynchings catalyzed by disinformation spread over social media highlight that the threat it poses crosses social scales and boundaries. This threat extends into the realm of military combat as early as 2019 a NATO StratCom experiment established that social media exploitation enabled successfully influencing soldiers participating in an exercise to carry out desired behaviors such as leaving their positions not fulfilling duties etc. Bay and Biteniece 2019. Thus information has become a global safety issue while disinformation can kill. While malign actors weaponized information for years governments have embedded information as a war fighting function. The use of AI is essential for scale, speed and automation of offensive and defensive online influence operations.

[EU Internet Law in the Digital Single Market](#) Tatiana-Eleni Synodinou, Philippe Jougleux, Christiana Markou, Thalia Prastitou-Merdi, 2021-06-25 With the ongoing evolution of the digital society challenging the boundaries of the law new questions are arising and new answers being given even now almost three

decades on from the digital revolution Written by a panel of legal specialists and edited by experts on EU Internet law this book provides an overview of the most recent developments affecting the European Internet legal framework specifically focusing on four current debates Firstly it discusses the changes in online copyright law especially after the enactment of the new directive on the single digital market Secondly it analyzes the increasing significance of artificial intelligence in our daily life The book then addresses emerging issues in EU digital law exploring out of the box approaches in Internet law It also presents the last cyber criminality law trends offenses international instrument behaviors and discusses the evolution of personal data protection Lastly it evaluates the degree of consumer and corporate protection in the digital environment demonstrating that now more than ever EU Internet law is based on a combination of copyright civil administrative criminal commercial and banking laws
