Computerised Test Generation For Cross National Military Recruitment A Handbook:

Computerised Test Generation for Cross-National Military Recruitment S.H. Irvine, 2014-03-03 Computerised Test Generation for Cross National Military Recruitment by Prof Sidney H Irvine is a handbook for use in occupational psychology test construction and psychometrics The book describes the development of the British Army Recruitment Battery BARB by Prof Irvine and his colleagues at the University of Plymouth BARB is a computer administered selection battery that is still in use to this day and is capable of developing new parallel tests for every candidate in the recruitment process In telling the story Sidney Irvine describes not only the development of the battery itself funded by the UK Ministry of Defence but all the work that went on before and afterwards in the United Kingdom with European allies and in the United States_x000D_ Prof Irvine argues that judicious application of the current state of the art in psychometric selection tests can be used to maximise retention and minimise attrition As such this long awaited book will be of great interest to psychologists psychometricians test developers those involved in personnel selection and all with an interest in military history in particular the history of military science With a foreword and chapter introductions from a worldwide array of subject matter experts the book also has a full subject index and an extensive bibliography I commend it heartily Professor Jamie Hacker Hughes CPsychol CSci FBPsS Former Defence Consultant Advisor in Psychology Ministry of Defence United Kingdom *Sociocognitive Foundations of Educational Measurement* Robert J. Mislevy, 2018-04-09 Several key developments challenge the field of educational measurement today demands for tests at larger scales with higher stakes an improved understanding of how people develop capabilities and new technologies for interactive digital assessments Sociocognitive Foundations of Educational Measurement integrates new developments in educational measurement and educational psychology in order to provide researchers testing professionals and students with an innovative sociocognitive perspective on assessment This comprehensive volume begins with a broad explanation of the sociocognitive perspective and the foundations of assessment then provides a series of focused applications to major topics such as assessment arguments validity fairness interactive assessment and a conception of measurement in educational assessment Classical test theory item response theory categorical models mixture models cognitive diagnosis models and Bayesian networks are explored from the resulting perspective Ideal for specialists in these areas graduate students developers and scholars in both educational measurement and fields that contribute to a sociocognitive perspective this book consolidates nearly a decade of research into a fresh perspective on educational measurement **Integrating Timing Considerations to Improve Testing Practices** Melissa J. Margolis, Richard A. Feinberg, 2020-06-03 Integrating Timing Considerations to Improve Testing Practices synthesizes a wealth of theory and research on time issues in assessment into actionable advice for test development administration and scoring One of the major advantages of computer based testing is the capability to passively record test taking metadata including how examinees use time and how time affects testing outcomes This has opened many questions for testing

administrators Is there a trade off between speed and accuracy in test taking What considerations should influence equitable decisions about extended time accommodations How can test administrators use timing data to balance the costs and resulting validity of tests administered at commercial testing centers In this comprehensive volume experts in the field discuss the impact of timing considerations constraints and policies on valid score interpretations administrative accommodations test construction and examinees experiences and behaviors and how to implement the findings into practice These 12 chapters provide invaluable resources for testing professionals to better understand the inextricable links between effective time allocation and the purposes of high stakes testing The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
