The Corpses of Times Generations RICHARD J. KOSCIEJEW,2014-01-09 Anyone who has ever tried to present a rather abstract scientific subject in a popular manner knows the great difficulties of such an attempt Either he succeeds in being intelligible by concealing the core of the problem and by offering to the reader only superficial aspects or vague allusions thus of deluding the reader by arousing in him the deceptive illusion of comprehension Or else he gives an expert account of the problem but as the untrained reader is unable to follow the exposition and becomes discouraged from

reading any further If these two categories are omitted from todays popular scientific literature surprisingly little remains But the little left is very valuable indeed It is very important that the public is given an opportunity to experience consciously and intelligently the efforts and results of scientific research It is not sufficient that each successive progression is taken up elaborated and applied by a few specialists in the field Restricting the body of knowledge to a small group deadens the philosophical spirit of these people and leads to spiritual poverty THE CORPSES OF TIMES GENERATIONS represents a valuable contribution to popular scientific writing The main ideas to Theory are extremely well presented Moreover the presents state of our knowledge in which the paradigms of science are aptly characterized Mr Kosciejew shows how the criterial growth of our factual knowledge with the striving for a unified conception comprising all empirical data has led to the present situation which is characterized despite all successes by an uncertainty concerning the choice of the basic theoretical concept

Bridges to Global Ethics Giuseppe Di Capua,Luiz Oosterbeek,2023-02-20 This book contributes to the current discussion on geoethics and global ethics within the geoscience and humanities communities It provides new content and insights into developing convergent human actions in response to global anthropogenic changes based on perspectives that make it possible to combine geoscience knowledge with humanities and social sciences approaches Selected authors present their reflections findings and insights regarding the vision of geoethics ethics of responsibility towards the Earth as global ethics from philosophical humanities and social sciences perspectives In addition they discuss ethical frameworks from diverse cultural traditions searching for points of intersection with geoethics The goal for global environmental problems to be managed via multi perspective approaches that can more effectively accommodate complexity Combining the strengths of the geosciences humanities and social sciences can pave the way for a paradigm shift in how human societies develop adaptive sustainable responses to environmental changes and societal inequalities

A Tenth of a Second Jimena Canales,2010-01-15 In the late fifteenth century clocks acquired minute hands A century later second hands appeared But it wasn t until the 1850s that instruments could recognize a tenth of a second and once they did the impact on modern science and society was profound Revealing the history behind this infinitesimal interval A Tenth of a Second sheds new light on modernity and illuminates the work of important thinkers of the last two centuries Tracing debates about the nature of time causality and free will as well as the introduction of modern technologies telegraphy photography cinematography Jimena Canales locates the reverberations of this perceptual moment throughout culture Once scientists associated the tenth of a second with the speed of thought they developed reaction time experiments with lasting implications for experimental psychology physiology and optics Astronomers and physicists struggled to control the profound consequences of results that were a tenth of a second off And references to the interval were part of a general inquiry into time consciousness and sensory experience that involved rethinking the contributions of Descartes and Kant Considering its impact on much longer time periods and featuring appearances by Henri Bergson Walter Benjamin and Albert Einstein

among others A Tenth of a Second is ultimately an important contribution to history and a novel perspective on modernity

Homo Temporalis Nitzan Itzhak Lebovic, 2025-01-15 *Homo Temporalis* focuses on the importance of temporal concepts for four German Jewish thinkers who profoundly shaped twentieth century intellectual history Martin Buber Walter Benjamin Hannah Arendt and Paul Celan By analyzing the concept of time Nitzan Lebovic explores Buber's stress on the temporality of the dialogue between I and Thou Benjamin's now time and dialectics in standstill Arendt's understanding of democracy as natality or a permanent revolution and the breathturn that informs Celan's poetry Framing the reception of German Jewish thinking in the second half of the twentieth century as a parallel story to the rise of the modern humanities *Homo Temporalis* also highlights how these foundational temporal concepts illuminate the causes of the present crisis in the humanities and its disciplinary limitations in the age of biopolitics and the Anthropocene

After Taste. Critique of insufficient reason Slavko Kacunko, 2021-06-02 *After Taste* is an inquiry into a field of study dedicated to the reconsideration reconstruction and rehabilitation of the concept of Taste Taste is the category whose systematic historical and actual dimensions have traditionally been located in a variety of disciplines The actuality and potential of the study is based on a variety of collected facts from readings and experiences which materialize in the following features One concept figurative Taste two thinking traditions analytic and synthetic continental and three interrelated dimensions systematic historic and actual are presented in three volumes As such the study presents a salient comprehensive companion for wider readership of humanities approaching conceptions of Taste for the first time Moreover *After Taste* is intended for anyone who hopes to make a further contribution to the subject Since its appearance and apparently short triumph some 250 years ago the concept of non literary Taste remained the linchpin of aesthetic theory and practice but also a category outreaching aesthetics Taste as the personal unity of the production theory and criticism of art and literature which was still largely taken as a given in the eighteenth century has meanwhile given way to a highly differentiated art world in which aesthetic discourse is placed in such a way that it can seemingly no longer have a conceptual or linguistic effect on general opinion making The critical role of Taste judges ratings and rankings in the feuilleton politics and social media on the one hand and the responding search for new canons on the other have had a huge impact on the academic and popular discourse today However Taste's impact on society is in fact all encompassing and yet without getting even close to the magnetic North of the academic compass *After Taste* fills the gaps of systematic research by a comprehensive tracing of the emergence of the doctrines discourses and disciplinary dimensions of Taste up to the peak of its systematic and historical trajectory in the eighteenth century and onwards into the present day The guiding goal is a post disciplinary rehabilitation of the contested category as a preparation for its productive usage in emerging academic and popular contexts Three intertwined research hypotheses form the guiding goal of an overall study of the agencies of Taste its institutionalizations and expert cultures The 1 first part provides a missing systematic perspective on the concept of Taste as a key factor for understanding the human faculties value theories and practices of

valuating The 2 second part traces the events at the peak of Taste's systematic and historical trajectories up until the late eighteenth century and verifies the historiographical hypothesis about the instrumentality of Taste for the production, reception and distribution of culture. The 3 third part reconstructs the major moments in which the contested concept of Taste experiences its post disciplinary rehabilitation in preparation for its future productive usage in the academic and popular discourses and practices. It shows how the category of Taste became the foundation legitimization and the catalyst for the emerging division of labour faculties and disciplines confirming the hypothesis of the immense impact and actuality of Taste in the contemporary world.
