Concept Research In Food Product Design And Development:

Concept Research in Food Product Design and Development Howard R. Moskowitz, Sebastiano Porretta, Matthias Silcher, 2008-02-28 Concepts are critical for the development and marketing of products and services They constitute the blueprint for these products and services albeit at the level of consumers rather than at the technical level A good product concept can help make the product a success by guiding developers and advertising in the right direction Yet there is a dearth of both practical and scientific information about how to create and evaluate concepts There has been little or no focus on establishing knowledge bases for concepts Concept development is too often relegated to the so called fuzzy front end Concept Research in Food Product Design and Development remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists The book begins with simple principles of concepts moves forward to methods for testing concepts and then on to more substantive areas such as establishing validity testing internationally and with children creating databases and selling in new methods for concept testing The book combines a how to business book with a detailed treatment of the different facets of concept research As such the book represents a unique contribution to business applications in food and consumer research methods The book is positioned specifically for foods to maintain a focus on a coherent set of topics Concept Research in Food Product Design and Development appeals to a wide variety of audiences R D marketing sensory analysts and universities alike Corporate R D professionals will learn how to create strong concepts Marketers will recognize how concepts are at the heart of their business Sensory analysts will find the book a natural extension of their interest in product features University students will understand how concept research is a critical part of the consumer connection Concept Research in Food Product Design and Development is the definitive innovative text in describing how to create analyze and capitalize upon new product concepts

Development Jim Smith, Edward Charter, 2011-03-08 According to an August 2009 report from PricewaterhouseCoopers the United States market for functional foods in 2007 was US 27 billion. Forecasts of growth range from between 8.5% and 20% per year or about four times that of the food industry in general. Global demand by 2013 is expected to be about 100 billion. With this demand for new products comes a demand for product development and supporting literature for that purpose. There is a wealth of research and development in this area and great scope for commercialization and this book provides a much needed review of important opportunities for new products written by authors with in depth knowledge of as yet unfulfilled health related needs. This book addresses functional food product development from a number of perspectives: the process itself, health research that may provide opportunities, idea creation, regulation and processes and ingredients. It also features case studies that illustrate real product development and commercialization histories. Written for food scientists and technologists, this book presents practical information for use in functional food product development. It is an essential resource for practitioners in functional food companies and food technology centres and is also of interest to researchers and students of food science. Key features: A comprehensive review of the latest opportunities in this commercially important sector of the food industry. Includes chapters highlighting functional food opportunities for specific health issues such as obesity, immunity, brain health, heart disease and the development of children. New technologies of relevance to functional foods are also addressed such as emulsion delivery systems and nanoencapsulation. Includes chapters on product design and the use of functional ingredients such as antioxidants, probiotics and prebiotics as well as functional ingredients from plant and dairy sources. Specific examples of taking products to market are provided in the form of case studies e.g. microalgae functional ingredients. Part of the Functional Food Science and Technology book series. Series Editor Fereidoon Shahidi.

Food Product Development: From Concept to the Marketplace I. Sam Saguy, Ernst Graf, 1990-10-31 Food Product Development presents in depth how to guidance to successful food product development. Drawing on the practical experience of 19 industry experts, the book presents a broad overview of practical aspects of industrial food R D today. In addition, it details how to control the many facets of food product development and successfully integrate the work of professionals from many diverse areas. New Food Product Development Gordon W. Fuller, 1994-02-23 This book provides an objective overview of the hectic, often chaotic and frequently unpredictable new food product development process. The stages of development are described from the vantage points of the technologist, marketer and senior management by an author who has worn all three hats. The book covers the various stages of product development including generating and sifting ideas against the company's objectives, the consumers perceived needs and expectations, the competitiveness of the marketplace, the technologist's ability to create and manufacture a safe product within budget and test marketing. Problems facing both small and large companies are confronted and solutions are proposed. Test marketing and the evaluation of such tests are discussed with some new suggestions for interpreting the criteria used. A chapter on organization presents ideas for

fostering creativity and avoiding communication and personality conflicts Trends in new ingredients and technologies to assist in the design of new products are given full coverage The last chapter is devoted to the future with stimulating discussion of new challenges to current trends in the industry
