Animal Homosexuality Aldo Poiani, 2010-08-19 Homosexuality is an evolutionary paradox in search for a resolution not a medical condition in search for a cure Homosexual behavior is common among social animals and mainly expressed within the context of a bisexual sexual orientation Exclusive homosexuality is less common but not unique to humans Poiani and Dixon invite the reader to embark on a journey through the evolutionary biological psychological and sociological aspects of homosexuality seeking an understanding of both the proximate and evolutionary causes of homosexual behavior and orientation in humans other mammals and birds The authors also provide a synthesis of what we know about homosexuality into a biosocial model that links recent advances in reproductive skew theory and various selection mechanisms to produce a comprehensive framework that will be useful for anyone teaching or planning future research in this field

Superminds Selmer Bringsjord, M. Zenzen, 2012-12-06 This is the first book length presentation and defense of a new theory of human and machine cognition according to which human persons are superminds Superminds are capable of processing information not only at and below the level of Turing machines standard computers but above that level the Turing Limit as information processing devices that have not yet been and perhaps can never be built but have been mathematically specified these devices are known as super Turing machines or hypercomputers Superminds as explained herein also have properties no machine whether above or below the Turing Limit can have The present book is the third and pivotal volume in Bringsjord's supermind quartet the first two books were *What Robots Can and Can't Be* Kluwer and *AI and Literary Creativity* Lawrence Erlbaum The final chapter of this book offers eight prescriptions for the concrete practice of AI and cognitive science in light of the fact that we are superminds

[The Discovery of the Artificial](#) Roberto Cordeschi, 2002-07-31 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental capabilities of other species to ideas related to artificial intelligence and to computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and

methodological studies will also appear from time to time The present volume offers a broad and imaginative approach to the study of the mind which emphasizes several themes namely the importance of functional organization apart from the specific material by means of which it may be implemented the use of modeling to simulate these functional processes and subject them to certain kinds of tests the use of mentalistic language to describe and predict the behavior of artifacts and the subsumption of processes of adaptation learning and intelligence by means of explanatory principles The author has produced a rich and complex lucid and readable discussion that clarifies and illuminates many of the most difficult problems arising within this difficult domain **Academy of Management Perspectives** ,2006 *The British National Bibliography*
