*Post-Apartheid Gothic* Mélanie Joseph-Vilain, 2021-03-19 Post Apartheid Gothic White South African Writers and Space analyzes the representation of space in recent works by South African writers. By combining analytical tools borrowed from Gothic studies with geocritical and postcolonial approaches, Mélanie Joseph Vilain assesses the literary mechanisms utilized by Damon Galgut, Henrietta Rose Innes, Lauren Beukes, Justin Carwright, and Lynn Freed to negotiate the complexities of post-apartheid identities in their fiction. Joseph Vilain argues that the literary representations of emblematic places, real or imagined, the home, the farm, the city, or the non-places of dystopia, express and reveal anxieties linked to the sharing of space in post-apartheid South Africa. The text successively revisits the places that have been shaping South African white writing since Olive Schreiner's *African Farm*; in other words, its topoi both in the etymological sense of place and in the literary sense of recurring themes or arguments. Joseph Vilain argues that these Gothicized topoi have provided writers with tools to explore the deep anxieties generated by the redefinition of South African society as the Rainbow Nation. While focusing specifically on the South African avatars of the Gothic and their interaction with local forms and genres like the *plaasroman*, the text also discusses the impact of globalization on South African literary, cultural, social, and political identities.

*Nordic Speculative Fiction* Jyrki Korppa, Aino-Kaisa Koistinen, Hanna-Riikka Roine, Marta Mboka Tveit, 2024-12-20 This volume brings together scholarly theories and practices on speculative fiction from the Nordic countries, including Denmark, Finland, Iceland, Norway, and Sweden, that are all rooted in similar values, culture, and history but are independent and unique societies. The book exhibits both the convergences and the diversity of the Nordics in fiction and fandom, as well as in research. It traces the roots of Nordic speculative fiction, how it has developed over time, and how the changes in Nordic environments and societies caused by overhanging shared global issues such as climate change, mass migration, and technological acceleration, find space in speculative practices. The first of its kind, this book allows for deeper insights into the unique characteristics that make Nordic literature and art recognisable and allows for a better understanding of the place of the Nordics within wider global culture systems. The chapters range from literary critiques, film and television studies, creative works by three Nordic creative writers, transcultural text comparisons, and contributions on speculative art to theoretical and methodological discussions on fandom, worldbuilding, and semantics. Part of the *Studies in Global Genre Fiction* series, this book contributes to connecting Nordic speculative fiction scholarship to the wider global community within the field. It will be of interest to scholars and general enthusiasts of speculative fiction and those with interest in Nordic fiction, film, and television studies, literary culture, or media studies, comparative literature, and cultural history, or art-based research.

[The New Routledge Companion to Science Fiction](#) Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13 The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the

pioneering research in the first edition the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print It also updates and expands the range of frameworks that are relevant to the study of science fiction The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context including South Asian Latin American Chinese and African diasporic science fiction The contributors use both well established critical and theoretical approaches and embrace a range of new ones including biopolitics climate crisis critical ethnic studies disability studies energy humanities game studies medical humanities new materialisms and sonic studies This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today Chapter 39 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
