Futuristic Trends in Structural Engineering Ajay Chourasia, Madhuri Kumari, R. Siva Chidambaram, Shilpa Pal, 2026-01-01
This book comprises select proceedings of the National Conference on Futuristic Structural Engineering StructE NatCon 2024. The volume focuses on interdisciplinary solutions and research works that address the challenges in the field of structural engineering and delves into cutting edge advancements that are reshaping the landscape of structural engineering. The overarching theme of the book will cover innovation in structural engineering with a focus on sustainability, resilience, and leveraging artificial intelligence and machine learning (AIML). The topics include Global Innovations in Structural Engineering, Sustainability in Built Environment, AI and ML Applications in Structural Engineering, Structural Resilience Vision for the Future, Health Monitoring, Forensic Structural Engineering, Advances in Construction Materials Technologies. It will be useful to graduate students, researchers, scientists, and practitioners working in structural engineering and related domains. Also, this book will be useful for the audience who are working on application of latest technologies like AI, ML, Data Analytics, Big Data in the structural engineering sector.

Food Fortification in a Globalized World M.G.Venkatesh
Mannar, Richard F. Hurrell, 2018-06-29. *Food Fortification in a Globalized World* outlines experiences over the past 50 years and future potential for the application of food fortification across a variety of foods in the industrialized and developing world. The book captures recent science and applications trends in fortification including emerging areas such as biofortification, nutraceuticals, and new nutrient intake recommendations, standards, policy, and regulation. The book proposes a balanced and effective food fortification strategy for nations to adopt. In covering the most technical scientific details in an approachable style, this work is accessible to a range of practitioners in industry, government, NGOs, academia, and research. Food fortification has become an increasingly significant strategy to address gaps in micronutrient intakes in populations with measurable impact in both industrialized and developing countries. While the positive impacts are well recognized, there are new concerns in some countries that excessive fortification of foods, outdated nutritional labeling rules, and misleading marketing tactics used by food manufacturers may result in young children consuming harmful amounts of some vitamins and minerals. Presents the latest science on fortification for the prevention of micronutrient deficiencies. Includes emerging areas such as biofortification, nutraceuticals, and new nutrient intake recommendations, standards, regulations, practices, and policies from around the world. Summarizes evidence of application of food fortification and measured impact on public health. Discusses how public policy impacts fortification of foods and nutritional deficiencies. Considers the complex economics of and market for fortified foods.

Postmenopausal Diseases and Disorders Faustino R. Pérez-López, 2019-07-10. Supported by the latest scientific data, this book serves as a guide to the clinical assessment of women's health during the second half of life.

post reproductive years including approaches to the management of the most frequent age related diseases and disorders and the most recent advances in treatment. In addition it discusses preventive aspects of healthcare in post reproductive women identifying lifestyle measures to enhance healthy aging. By highlighting research gaps it promotes the development of quick and easy to use assessment tools and predictive markers of age related co-morbidities. As such the book is a valuable resource for researchers and clinicians alike.
