## **Caterpillar 3176**

Introduced in 1988, the 3176 has quickly demonstrated its ability to compete in the heavy-duty truck market. The state-of-the-art electronics combined with the Caterpillar's experience with four stroke diesel engines have made the 3176 truly a world class engine. At 1945 pounds (882 kg), the 3176 has the best weight to horsepower ratio in the industry.

The 3176B is the next generation in this engine series. This engine starts with the strengths established by the 3176 and refines the engine to enhance the fuel economy, performance, and reliability. Another concern for 1994 is the stringent EPA standards which the 3176B is able to meet without the need for after-treatment.
