new vocabulary for moral and character education In a more expansive approach than typically seen this book examines the  
nature and function of conscience Building upon the foundational work of Thomas Green 1999 the vocabulary of reflexive  
judgment reflexive emotions normation and voices of conscience are explored as they apply to moral formation with examples  
and applications provided Specific attention is given to the interrelationship of the collective conscience with democracy  
Educating for conscience and the notion of the sacred are also examined Written from an educator s perspective this book
