Hill's distraction free approach combines decades of tutoring experience with the proven methods of his Russian math teachers. The result: learn in a few days what conventional schools stretch into months. Covers classical and analytic geometry. Teaches general principles that can be applied to a wide variety of problems. Avoids the mindless and excessive routine computations that characterize conventional textbooks. Treats geometry as a logically coherent discipline not as a disjointed collection of techniques. Restores proofs to their proper place to remove doubt, convey insight and encourage precise logical thinking. Omits digressions, excessive formalities and repetitive exercises. Includes problems with solutions that extend your knowledge rather than merely reinforce it.
