**Teacher Perception of Pacing Guide Use in the Secondary Classroom** Donna Michele Smith Turner, 2015 Historically, teachers have exercised considerable autonomy in the day to day learning that occurs in their classrooms. Now it is growing increasingly rare for a teacher to experience this type of professional freedom. In response to high stakes testing, national and state academic content standards, and most recently the common core standards, pacing guides are one of the more recent devices schools are using to implement and monitor curriculum. The purpose of this research project is to investigate teacher opinion toward these pacing guides. An online survey called the Pacing Guide Survey was delivered to secondary regular and special education teachers in core subject areas of mathematics, science, social studies, and language arts. The teachers were asked about whether or not they use pacing guides, their attitude and comfort level in using pacing guides, as well as information concerning the population of their high school such as demographics, enrollment, and single or multiple high schools. Building level factors such as professional development initiatives, methods of curriculum monitoring and pacing guide development and revisions processes, teacher factors such as years teaching, years using pacing guides, confidence in content area and educational background. Administrators were also interviewed to form a complete picture of pacing guide development and implementation in the secondary education environment. Quantitative data were analyzed using bivariate Spearman's rank order correlation and qualitative data were

analyzed using a combination of thematic data analysis and quasi statistical methods Recommendations based on the data collected are Teachers should be provided with the flexibility to address student needs in the classroom Teacher input into pacing guide development implementation and revision process is necessary to ensure that student needs are addressed Team autonomy is key and teacher teams need to be provided with the necessary support structure to provide meaningful learning experiences for their students    **Resources in Education** ,1979    Getting Started with Rigorous Curriculum Design Larry Ainsworth,2013 School districts are now successfully implementing the Rigorous Curriculum Design process to redesign their curricula to fulfill the promise of the Common Core and prepare students for success on the coming national assessments Each chapter of Getting Started With Rigorous Curriculum Design will provide educators with collective wisdom insights and ideas to enrich and expand understandings they may not have yet come to on their own    Investigating the Effectiveness of Curriculum Pacing Guides Katherine Renee Shelor,2010    *Eureka Math Pre-K Study Guide* Great Minds,2016-09-13 Eureka Math is a comprehensive content rich PreK 12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics CCSSM and carefully sequences the mathematical progressions into expertly crafted instructional modules The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location unpacking the standards in detail so that both users and non users of Eureka Math can benefit equally from the content presented The Eureka Math Curriculum Study Guide Grade PK provides an overview of all of the Pre Kindergarten modules including Counting to 5 Shapes Counting to 10 Comparison of Length Weight Capacity and Numbers to 5 and Addition and Subtraction Stories and Counting to 20    **Creating Standards-Based Integrated Curriculum** Susan M. Drake,2012-05-08 Translate the new standards into meaningful curriculum This updated edition of Susan Drake s classic text serves as a road map through the Common Core State Standards giving you the flexibility to design an integrated curriculum that s right for your students Focusing on multidisciplinary interdisciplinary and transdisciplinary approaches Drake provides guidance on Unpacking the Common Core State Standards Planning assessment tasks Designing instructional strategies Developing daily activities Helping students connect essential questions to enduring understandings Included are new examples of exemplary programs discussion questions a sample completed interdisciplinary curriculum and activities for building your own standards based integrated curriculum
