Cure That Cold Fight That Flu:

Butte and the 1918 Influenza Pandemic Janelle M. Olberding, 2019 Butte was an incomparable city but in late 1918 some of the things that made it so exceptional also made it incredibly cruel. That year the Spanish flu swept across the country killing some 675 000 Americans before year's end. Some of the country's highest mortality rates occurred in its cities Philadelphia, San Francisco, Boston, and Butte. In less than six months the virus killed almost 2 percent of Butte's residents and overwhelmed public health systems. Experimental treatments, civil unrest, death, and human resilience followed in the dramatic final weeks of the year. Author Janelle Olberding recounts the emotional struggle of the men and women who fought against and suffered from and succumbed to influenza on the Richest Hill on Earth. **The Honey Cure for Home Apothecary, Remedies Every Mom Can Trust: Boost immunity, soothe everyday ailments, and heal naturally with honey, propolis, and other bee remedies**

Novel Approach to Curing Cancer Jianqing Wu, Ping Zha, 2019-08-11 In this book, the authors make extensive comparison between medical treatments and health optimization methods, an improved mind-body model in order to determine their relative and TRUE benefits for cancer patients. For the health optimization method, they examine its use, history, acceptance, and performance throughout its history and for medicine, they examine medical treatment history, leading cancer theories, standard of care formation, formation of legal frameworks and overwhelming performance data we could find from the massive medical literature. We can show with irrefutable evidence why medicine cannot cure cancer and what role it is actually playing. The book 1 discloses a systematic methodology for curing cancer in confidence, 2 extensively discusses how to do right things to win a speed contest in fighting cancer, 3 extensively discusses how to do right things to control cancer cell population, a critical strategy for survival, 4 provides detailed analysis of fatal common mistakes that have taken nine of ten cancer patient lives, 5 exposes flaws in the cancer treatment models, medical research model, the foundation of medicine, and 6 conduct a detailed analysis of four killer

factors which are routinely found in nearly all cancer care The approach used to similar to one used in Health Optimization Engineering a new branch of health art The book teaches the decisive roles of SPEED NUMBER and MULTIPLE FACTORS and how to fight cancer by using a two way optimization methodology Those three terms and optimization method are not mentioned in medical books cancer research articles and are not part of the language used in hospitals Our simulation and our kinetic studies show that both cancer development and reversal processes would take many years The rates of reversals for cancer and all chronic diseases are so slow that medicine cannot accurately evaluate This is why medicine cannot recognize or refuses to acknowledge any cure that requires half a year to several years to accomplish The approach we use in this book is directly in conflict with three core concepts in medicine dualism reductionism and population based approach Moreover we found that medical treatments can partially neutralize and totally nullify the curative benefits of our optimization method Based on our own findings and the results from reanalyzing massive existing medical publications we inevitably found that medical treatments are primarily responsible for creating the cancer panic and the treatments shorten lives in a super majority of cases We try to analyze every issue in the most comprehensive way Our analysis covers medical model and its legal framework leading cancer theories treatment development histories formation of standard of care control selections in drug trials the massive cancer controversies and mountains of actual performance data The most convincing evidence is the performance verdicts by recent medical studies and latest meta reviews We try to built a watertight case that precludes any of those arguments that have been made by proponents of the reductionist medical model
