L. Dunn,2020-01-19   **Cyberphobia** Edward Lucas,2015-11-17 Cybercrime is increasingly in the news Stories about weaknesses in cybersecurity like the Heartbleed leak or malicious software on the cash registers at your local Target have become alarmingly common Even more alarming is the sheer number of victims associated with these crimes the identities and personal information of millions is stolen outright as criminals drain bank accounts and max out credit cards The availability of stolen credit card information is now so common that it can be purchased on the black market for as little as four dollars with potentially thousands at stake for the victims Possibly even more catastrophic are hackers at a national level that have begun stealing national security or economic and trade secrets The world economy and geopolitics hang in the balance In Cyberphobia Edward Lucas unpacks this shadowy but metastasizing problem confronting our security both for individuals and nations The uncomfortable truth is that we do not take cybersecurity seriously enough Strong regulations on automotive safety or guidelines for the airline industry are commonplace but when it comes to the internet it might as well be the Wild West Standards of securing our computers and other internet connected technology are diverse but just like the rules of the road meant to protect both individual drivers and everyone else driving alongside them weak cybersecurity on the computers and internet systems near us put everyone at risk Lucas sounds a compelling and necessary alarm on behalf of cybersecurity and prescribes immediate and bold solutions to this grave threat   Sexed Texts Paul Baker,2008-07 Sexed Texts explores the complex role that language plays in the construction of sexuality and gender two concepts that are often discussed separately although in practice are closely intertwined The book draws on a range of theoretical perspectives and published research including performativity theory feminism queer studies psychoanalytical theory Marxism social constructionism and essentialism Illustrative examples are taken from written spoken internet non verbal visual media scripted and naturally occurring texts Some of the questions addressed in the book include how do people construct their own and other s gendered or sexual identities through the use of language What is the relationship between language and desire In what ways do language practices help to reflect and shape different gendered sexed discourses as normal problematic or contested Taking a broadly deconstructionist perspective the book progresses from examining what are seen as preferable or acceptable ways to express gender and sexuality moving towards more tolerated identities practices and desires and finally arriving at marginalized and tabooed forms The book locates sexuality and gender as socially constructed and therefore examines language use in terms of socio historical factors
