## Caterpillar Tool Guide:

A Practical Guide to Localization Bert Esselink, 2000-01-01 Translation technology has evolved quickly with a large number of translation tools available. In this revised addition much content has been added about translating and engineering HTML and XML documents, multilingual web sites and HTML based online help systems. There is a focus on translators who want to learn about localization and translation technology.

*The Making of Tom Cat* William Garden, 2004-12 You'll enjoy this part story, part boatbuilding manual of a small beetle cat-like boat from a legendary designer with probably more of his creations built than any other person. You'll find out not only how the boat is built but also how the design came to be from someone with a long lifetime of fooling around with boats. As told from Toad's Landing on an island off British Columbia, it becomes quite apparent that whimsy and fun are not limited to young boys and girls. The first thing you may notice about Tom Cat is the handsome cuddy. The next thing to realize is she is constructed with a combination of the traditional plank on frame carvel and modern epoxy for the seams. The result is a rugged boat which doesn't require the swelling of planks or the recaulking of seams in the years to come. If you are just too pure a traditionalist for epoxy of course you can plank and caulk.

*A Project-Based Approach to Translation Technology* Rosemary Mitchell-Schuitevoerder, 2020-06-15 A Project Based Approach to Translation Technology provides students of translation and trainee translators with a real time translation experience with its translation platforms, management systems and teamwork. This book is divided into seven chapters reflecting the building blocks of a project based approach to translation technology. The first chapter identifies the core elements of translation environment, tools and collaborative work methods, while Chapters 2 and 4 review the concept of translation memory and terminology databases and their purposes. Chapter 3 covers machine translation embedded in the technology and the other chapters discuss human and technological quality assurance, digital ethics and risk management and web based translation management systems. Each chapter follows a common format and ends with project based assignments. These assignments draw and build on real time contexts covering the consecutive steps in the workflow of large and multilingual translation projects. Reviewing the many translation technology tools available to assist the translator and other language service providers, this is an indispensable book for advanced students and instructors of translation studies, professional translators and technology tool providers.
