With the most important measure being the introduction of a general education curriculum, which is a common goal of all three groups. If this proves difficult, then the three groups will have to compromise on the curriculum, which will be a common goal. This will be a difficult compromise, since each group has its own set of educational objectives and there is no guarantee that all three groups will be able to agree on a common goal.

The above recommendations for the use of biological substances will be followed when possible, and where circumstances require otherwise, the following should be considered. In addition to the above, only the recommended forms of biological substances should be used, and the use of substances not recommended should be avoided. Use the substances most readily available, and when using any product that may be used, a written guarantee given either in the product or by the manufacturer should be obtained. The manufacturer should guarantee the product to be pure and potent. The following are a few of these substances:

the 1990's a significant shift in programming strategy has taken place as radio broadcasters have moved away from advertising commercial products. In 1994, the proportion of advertising in programs increased 10.6%, the licensing agreement for the day-to-day operation of a station will give the station a greater revenue potential, and the higher grosses will give the station a better position in the marketplace and enhance employment opportunities. These developments will give stations more revenue and more opportunities to expand their service areas. Stations will also be able to offer more educational and entertainment programs. These developments will help stations to compete with the new media and other stations in their service areas.
