Current Flow The Electrification Of Palestine:

Current Flow Ronen Shamir, 2013-11-06 Whether buried underfoot or strung overhead electrical lines are omnipresent. Not only are most societies dependent on electrical infrastructure but this infrastructure actively shapes electrified society. From the wires, poles and generators themselves to the entrepreneurs, engineers, politicians and advisors who determine the process of electrification, our electrical grids can create power and politics just as they transmit it. *Current Flow* examines the history of electrification of British ruled Palestine in the 1920s as it marked, affirmed and produced social, political and economic difference between Arabs and Jews. Considering the interplay of British colonial interests, the Jewish Zionist leanings of a commissioned electric company and Arab opposition within the case of the Jaffa Power House, Ronen Shamir reveals how electrification was central in assembling a material infrastructure of ethno-national separation in Palestine long before political partition plans had ever been envisioned. Ultimately, *Current Flow* sheds new light on the history of Jewish-Arab relations and offers broader sociological insights into what happens when people are transformed from users into elements of networks.

Landmark Cases in Public International Law Eirik Bjorge, Cameron Miles, 2017-12-28 The past two hundred years have seen the transformation of public international law from a rule-based extrusion of diplomacy into a fully fledged legal system. *Landmark Cases in Public International Law* examines decisions that have contributed to the development of international law into an integrated whole whilst also creating specialised sub-systems that stand alone as units of analysis. The significance of these decisions is not taken for granted with contributors critically interrogating the cases to determine if their reputation as landmarks is deserved. Emphasis is also placed on seeing each case as a diplomatic artefact, highlighting that international law while unquestionably a legal system, remains reliant on the practice and consent of states as the prime movers of development. The cases selected cover a broad range of subject areas including state immunity, human rights, the environment, trade and investment, international organisations, international courts and tribunals, the laws of war, international crimes and the interface between international and municipal legal systems. A wide array of international and domestic courts are also considered from the International Court of Justice to the European Court of Human Rights, World Trade Organization Appellate Body, US Supreme Court and other adjudicative bodies. The result is a three-dimensional picture of international law: what it was, what it is and what it might yet become.

Electrical Palestine Fredrik Meiton, 2019-01-15 Electricity is an integral part of everyday life so integral that we rarely think of it as political. In *Electrical Palestine*, Fredrik Meiton illustrates how political power just like electrical power moves through physical materials whose properties govern its flow. At the dawn of the Arab-Israeli conflict, both kinds of power were circulated through the electric grid that was built by the Zionist engineer Pinhas Rutenberg in the period of British rule from 1917 to 1948. Drawing on new sources in Arabic, Hebrew and several European languages, *Electrical Palestine* charts a story of rapid and uneven development that was greatly influenced by the electric grid and set the stage for the conflict between Arabs and Jews.

Electrification Meiton shows was a critical element of Zionist state building The outcome in 1948 therefore of Jewish statehood and Palestinian statelessness was the result of a logic that was profoundly conditioned by the power system a logic that has continued to shape the area until today
