Cardozo A Study In Reputation:

Cardozo Richard A. Posner,1990 What makes a great judge How are reputations forged Why do some reputations endure while others crumble And how can we know whether a reputation is fairly deserved In this ambitious book Richard Posner confronts these questions in the case of Benjamin Cardozo from publisher description

Cardozo, a Study in Reputation by Richard A. Posner Daniel Warner,1992 **The Uses and Abuses of Presidential Ratings** Meenekshi Bose,2003

Debates about the uses of presidential ratings raise important questions about the accuracy of grouping leaders into single categories Categories serve to identify some common features within a group but they also mask important differences which may distinguish a person significantly from others in the same category The small number of presidents may make the value of subdividing them minimal especially given the range of qualities by which we evaluate presidential leadership Depending on the criteria used a president may move sharply up or down in the survey presidents such as Richard Nixon and Bill Clinton both of whom faced scandals in their administrations but also had notable policy achievements are good examples Yet rating presidents continues to be a favourite pastime of scholars and journalists and new surveys always spark heated discussion about why the rankings of certain presidents have changed from previous surveys This new and timely volume summarises the debates and assesses the uses of presidential ratings in light of those discussions While presidential ratings surveys do generalise presidential performance and cannot capture all of a president's qualities
