Parent,2013-06-29 In contrast to the effortless ease with which human beings control their limbs the design of controllers for robotic manipulator arms is a detailed meticulous business Motors controlling the arms need to be started and stopped at just the right moment so that the performance demanded by the user may be achieved at the end of a complicated manoeuvre And yet the same user wishes to express the task for the robot in the

simplest possible terms without reference to the minute details of control sequences that his task demands. It is the design of such interfaces between man and machine that is the subject of this volume. Parent and Lorangeau develop the subject in a direct and logical order. They first explain the principles of maximal effort control which not only ensure that motors are driven to provide high accuracy but also that this should be done with the least waste of energy and in the shortest possible time. In this context they describe the operation of pneumatic logical devices that make rapid decisions at power levels that exceed by several orders those that can be achieved with electronic devices. They achieve this whilst keeping the reader aware of the logical principles that are involved in the design of master control units, the devices responsible for appropriate actions being taken as a function of time. *ABAQUS/Viewer User's Manual*, 2001. Minding Your Business with MapInfo®. Angela Whitener, Jeff Davis, 1998. *Minding Your Business with MapInfo* illustrates how business mapping technology and MapInfo software can improve decision making and competitiveness. Professionals in a variety of fields can explore the advantages of geographically mapping business data and MapInfo users can learn new applications. Case studies are included. Ubiratã Kickhöfel Alves, Jennifer Imaregna Alcantara de Albuquerque, 2022-12-19. In the field of second language L2 acquisition, the number of studies focusing on L2 pronunciation instruction and perceptual production training has increased as new classroom methodologies have been proposed and new goals for L2 pronunciation have been set. This book brings together different approaches to L2 pronunciation research in the classroom or in the language laboratory. 13 chapters written by well known researchers focusing on a variety of first and target languages are divided into four parts: Pronunciation development and intelligibility; implications for teaching and training; studies on L2 pronunciation teaching; L2 pronunciation training; implications for the classroom and Pronunciation in the laboratory. High Variability Phonetic Training. Intended for researchers in the fields of second language acquisition, phonetics, phonology, psycholinguistics, speech therapies, speech technology, as well as second language teaching, this book not only summarizes the current research questions on L2 pronunciation teaching and training but also predicts future scenarios for both researchers and practitioners in the field.
