Data Oriented Development With Angularjs:

Data-oriented Development with AngularJS Manoj Waikar, 2015-04-28 This book helps beginner level AngularJS developers organize AngularJS applications by discussing important AngularJS concepts and best practices If you are an experienced AngularJS developer but haven't written directives or haven't created custom HTML controls before then this book is ideal for you

Mastering Scala Machine Learning Alex Kozlov, 2016-06-28 Advance your skills in efficient data analysis and data processing using the powerful tools of Scala Spark and Hadoop About This Book This is a primer on functional programming style techniques to help you efficiently process and analyze all of your data Get acquainted with the best and newest tools available such as Scala Spark Parquet and MLlib for machine learning Learn the best practices to incorporate new Big Data machine learning in your data driven enterprise to gain future scalability and maintainability Who This Book Is For Mastering Scala Machine Learning is intended for enthusiasts who want to plunge into the new pool of emerging techniques for machine learning Some familiarity with standard statistical techniques is required What You Will Learn Sharpen your functional programming skills in Scala using REPL Apply standard and advanced machine learning techniques using Scala Get acquainted with Big Data technologies and grasp why we need a functional approach to Big Data Discover new data structures algorithms approaches and habits that will allow you to work effectively with large amounts of data Understand the principles of supervised and unsupervised learning in machine learning Work with unstructured data and serialize it using Kryo Protobuf Avro and AvroParquet Construct reliable and robust data pipelines and manage data in a data driven enterprise Implement scalable model monitoring and alerts with Scala In Detail Since the advent of object oriented programming new technologies related to Big Data are constantly popping up on the market One such technology is Scala which is considered to be a successor to Java in the area of Big Data by many like Java was to C C in the area of distributed programming This book aims to take your knowledge to next level and help you impart that knowledge to build advanced applications such as social media mining intelligent news portals and more After a quick refresher on functional programming concepts using REPL you will see some practical examples of setting up the development environment and tinkering with data We will then explore working with Spark and MLlib using k means and decision trees Most of the data that we produce today is unstructured and raw and you will learn to tackle this type of data with advanced topics such as regression classification integration and working with graph algorithms Finally you will discover at how to use Scala to perform complex concept analysis to monitor model performance and to build a model repository By the end of this book you will have gained expertise in performing Scala machine learning and will be able to build complex machine learning projects using Scala Style and approach This hands on guide dives straight into implementing Scala for machine learning without delving much into mathematical proofs or validations There are ample code examples and tricks that will help you sail through using the standard techniques and libraries This book provides practical examples from the field on how to correctly

tackle data analysis problems particularly for modern Big Data datasets **Transactions on Engineering Technologies** Gi-Chul Yang,Sio-Iong Ao,Xu Huang,Oscar Castillo,2016-03-25 This volume comprises selected extended papers written by prominent researchers participating in the International MultiConference of Engineers and Computer Scientists 2015 Hong Kong 18-20 March 2015 The conference served as a platform for discussion of frontier topics in theoretical and applied engineering and computer science and subjects covered include communications systems control theory and automation bioinformatics artificial intelligence data mining engineering mathematics scientific computing engineering physics electrical engineering and industrial applications The book describes the state of the art in engineering technologies and computer science and its applications and will serve as an excellent reference for industrial and academic researchers and graduate students working in these fields

A Guide to Software Quality Engineering Shravan Pargaonkar,2024-06-04 In today's fast-paced digital world, delivering high-quality software is not just a goal; it's an absolute necessity. **A Guide to Software Quality Engineering** is a companion book for anyone involved in software development, testing, or quality assurance. This comprehensive book takes you on a transformative journey through the world of software quality engineering, providing invaluable insights, practical methodologies, and expert advice that will elevate your projects to new levels of excellence. The book features the following points: Performance Testing, Security Testing, Usability Testing, Continuous Integration, and Continuous Testing; Requirements Engineering and Quality Code Quality; and Static Analysis, Defect Management, and Root Cause Analysis. Dive into the fundamental principles of software quality engineering, understanding the critical role it plays in ensuring customer satisfaction, user experience, and the overall success of your software products. Whether you're a seasoned professional or a budding enthusiast, this book caters to all levels of expertise.

Web Technology Akshi Kumar,2018-08-06 This book intends to expound the complete concept of Web in Theory, Web in Research, and Web in Practice with the help of worked-out examples for better understanding. Planned as a comprehensive reading for beginners and a reference for advanced learners, the book includes latest developments and approaches related to the World Wide Web. **Data Intensive Computing Applications for Big Data** Mamta Mittal, Valentina Emilia Balas, D. Jude Hemanth, Raghvendra Kumar, 2018-01-15 The book **Data Intensive Computing Applications for Big Data** discusses the technical concepts of big data, data intensive computing through machine learning, soft computing, and parallel computing paradigms. It brings together researchers to report their latest results or progress in the development of the above-mentioned areas. Since there are few books on this specific subject, the editors aim to provide a common platform for researchers working in this area to exhibit their novel findings. The book is intended as a reference work for advanced undergraduates and graduate students, as well as multidisciplinary, interdisciplinary, and transdisciplinary research workers and scientists, on the subjects of big data and cloud parallel and distributed computing, and explains didactically many of the core concepts of these approaches for practical applications. It is organized into 24 chapters, providing a comprehensive overview of big data.

analysis using parallel computing and addresses the complete data science workflow in the cloud as well as dealing with privacy issues and the challenges faced in a data intensive cloud computing environment The book explores both fundamental and high level concepts and will serve as a manual for those in the industry while also helping beginners to understand the basic and advanced aspects of big data and cloud computing

AngularJS 1: Building a Data-Driven App, 2017 Want to create data driven web applications AngularJS is a great choice It allows you to build apps where multiple users can push and pull data at the same time in real time However while the framework is easy to learn it can be tough to master This course is the second in a two part series designed to show you how Angular works in the real world It takes up where AngularJS 1 Adding Registration to Your Application left off a simple application that checks users in and out of meetings Here instructor and Angular advocate Ray Villalobos shows how to enhance the existing app with new views and controllers to reward random checked in users with prizes Learn how to create forms edit database records create methods randomize record selections and style and secure your app With these project based lessons you ll learn how to see how data driven programming with AngularJS can help your apps react to real time data streams

MEDINFO 2017: Precision Healthcare through Informatics Marie-Christine Jaulet, Dongsheng Zhao, 2018-01-15 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods applications and technology constantly offering opportunities for supporting the customization of healthcare to individual patients This book presents the proceedings of the 16th World Congress of Medical and Health Informatics MedInfo2017 held in Hangzhou China in August 2017 which also marked the 50th anniversary of the International Medical Informatics Association IMIA The central theme of MedInfo2017 was Precision Healthcare through Informatics and the scientific program was divided into five tracks connected and digital health human data science human organizational and social aspects knowledge management and quality and safety and patient outcomes The 249 accepted papers and 168 posters included here span the breadth and depth of sub disciplines in biomedical and health informatics such as clinical informatics nursing informatics consumer health informatics public health informatics human factors in healthcare bioinformatics translational informatics quality and safety research at the intersection of biomedical and health informatics and precision medicine The book will be of interest to all those who wish to keep pace with advances in the science education and practice of biomedical and health informatics worldwide

Applications in Electronics Pervading Industry, Environment and Society Sergio Saponara, Alessandro De Gloria, Francesco Bellotti, 2021-06-04 This book features the manuscripts accepted for the Special Issue Applications in Electronics Pervading Industry Environment and Society Sensing Systems and Pervasive Intelligence of the MDPI journal Sensors Most of the papers come from a selection of the best papers of the 2019 edition of the Applications in Electronics Pervading Industry Environment and Society APPLEPIES Conference which was held in November 2019 All these papers have been significantly enhanced with novel experimental results The papers give an overview of the trends in research and

development activities concerning the pervasive application of electronics in industry the environment and society The focus of these papers is on cyber physical systems CPS with research proposals for new sensor acquisition and ADC analog to digital converter methods high speed communication systems cybersecurity big data management and data processing including emerging machine learning techniques Physical implementation aspects are discussed as well as the trade off found between functional performance and hardware system costs Information Science and Applications Kuinam J. Kim,2015-02-17 This proceedings volume provides a snapshot of the latest issues encountered in technical convergence and convergences of security technology It explores how information science is core to most current research industrial and commercial activities and consists of contributions covering topics including Ubiquitous Computing Networks and Information Systems Multimedia and Visualization Middleware and Operating Systems Security and Privacy Data Mining and Artificial Intelligence Software Engineering and Web Technology The proceedings introduce the most recent information technology and ideas applications and problems related to technology convergence illustrated through case studies and reviews converging existing security techniques Through this volume readers will gain an understanding of the current state of the art in information strategies and technologies of convergence security The intended readership are researchers in academia industry and other research institutes focusing on information science and technology
