**Latour: Globalisation, Inequity and Climate Change** Matthew R. Jones, Arunima S. Mukherjee, Devinder Thapa, Yingqin Zheng, 2023-12-06 This book constitutes the refereed proceedings of the IFIP WG 8.2 and WG 9.4 Joint Working Conference on After Latour Globalisation Inequity and Climate Change IFIPJWC 2023 held in Hyderabad India during December 7-8 2023 The 15 full papers presented together with 13 short papers were carefully reviewed and selected from 60 submissions They are organized in topical sections as follows climate change and digital sustainability ICT s and sustainable development IS in the education sector privacy trust and surveillance theories and methods *Debt Management Systems*, 1990 Debt management is a relatively new five to ten years old in its present shape function of government Building a successful debt management office can take as long as ten years Perhaps some of the failures reported by participants were necessary steps on the way to better debt management Seen from this long term perspective the developing countries have perhaps unwittingly been involved in a research and development activity governments should not worry too much about false starts or time and money lost As in all research activities the goal must be to learn from past mistakes to learn from others

successes and errors and to apply these lessons towards the future The creation of a debt management unit and the coordination required for good debt management can be expected to generate resistance from both other agencies and the private sector Thus the international organizations with an interest in improving debt management in the developing countries have a major role to play in taking the issues of debt management including the importance of the debt office to decisionmakers at the highest levels in their policy dialogue and lending activities Although problems remain both upstream and downstream from the computer supported operations of debt data management it is agreed that these information systems are much closer to an acceptable solution than was the case in the past
