## **Data Integration Framework Information Visualization:**

From Integrated Publication and Information Systems to Information and Knowledge Environments Matthias Hemmje, Claudia Niederee, Thomas Risse, 2005-01-31 This book constitutes a commemorative volume devoted to Erich J. Neuhold on the occasion of his 65th birthday. The 32 invited reviewed papers presented are written by students and colleagues of Erich Neuhold throughout all periods of his scientific career. The papers are organized in the following topical sections: Database management enabling information systems, Semantic Web drivers for advanced information management, Securing dynamic media content integration, From digital libraries to intelligent knowledge environments, Visualization key to external cognition in virtual information environments, From human computer interaction to human artefact interaction, Domains for virtual information and knowledge environments.

**Intuitive Human Interfaces for Organizing and Accessing Intellectual Assets** Gunter Grieser, Yuzuru Tanaka, 2005-02-09 This book constitutes the thoroughly refereed post proceedings of the 2004 International Workshop on Intuitive Human Interfaces for Organizing and Accessing Intellectual Assets held in Dagstuhl Castle Germany in March 2004. The 17 revised full papers presented together with an introductory overview have gone through two rounds of reviewing and revision. The papers are organized in topical sections on man machine interface for intuitive knowledge access, intelligent pad and memo media visualization and design of information access spaces and semantics and narrative organization and access of knowledge.

Database and Expert Systems Applications Abdelkader Hameurlain, Rosine Cicchetti, Roland Traunmüller, 2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 2-6 2002 at the Universit Aix Marseille II France. The quickly growing field of information systems required the establishment of more specialized discussion platforms: the DaWaK conference, EC Web conference, eGOV conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence. The resulting book was prepared with great effort. Starting with the preparation of submitted papers, the papers went through the reviewing process. The accepted papers were revised to final versions by their authors and arranged to the conference program. This year 241 papers were submitted and our thanks go to all who have contributed. The program committee and the supporting reviewers produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation. The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster. A vast part of applied computer science was covered. In this way DEXA has blazed the trail. At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible. These are IUT Universit Aix Marseille II, FAW DEXA Association, the Austrian Computer Society and Microsoft Research.
