Dugan, 2019 Millennials in the U S have been characterized as uninterested in religion as defectors from religious institutions and as agnostic about the role of religious identity in their culture. Amid the rise of so-called nones, though, there has also been a countervailing trend: an increase in religious piety among some millennial Catholics. The Fellowship of Catholic University Students (FOCUS), which began evangelizing college students on American university campuses in 1998, hires recent college graduates to evangelize college students and promote an attractive and culturally savvy Catholicism. These millennial Catholics have personal relationships with Jesus, attend Mass daily, and know and defend papal teachings while also being immersed in U.S. popular culture. With their skinny jeans, devotional tattoos, and large framed glasses, FOCUS missionaries embody a hip, attractive style of Catholicism. They promote a faith that interweaves distinctly Catholic identity with outreach methods of twentieth-century evangelical Protestants and the anxieties of middle-class emerging adulthood. Though this new generation of missionaries lives according to strict gender essentialism prescribed by papal teachings, including the notions that men lead while women follow and that biology dictates gender roles, they also support stay-at-home fatherhood and women earning MBAs. *Millennial Missionaries* examines how these young people navigate their Catholic and American identities in the twenty-first century. Illuminating the ways missionaries are reshaping American Catholic identity, Katherine Dugan explores the contemporary U.S. religious landscape from the perspective of millennials who proudly proclaim "I am Catholic" and devote years of their lives to convincing others to do the same.

Framing Medieval Bodies Sarah Kay, Miri Rubin, 1996 In this book, available at last in paperback, Kauppi develops a structural constructivist theory of the European Union and critically analyses, through French and Finnish empirical cases, the political practices that maintain the Union's democratic deficit. Kauppi conceptualises the European Union as both an arena for political contention and a nascent political order. In this evolving, multi-levelled European political field, individuals and groups construct material and symbolic structures of political power grounded in a variety of social resources such as nationality, culture, and gender. The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy. Supranational executive networks have become more autonomous, reinforcing the dominance of the resources they control. At the same time, national political cultures condition the political status of elected institutions such as the European parliament. The book is particularly suited for undergraduate and graduate students in the fields of European Politics, European Union Studies, and International Relations.
