Handbook of Research on Technology Tools for Real-World Skill Development Rosen, Yigal,Ferrara, Steve,Mosharraf, Maryam,2015-10-19 Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem solving skills for the digital age The Handbook of Research on Technology Tools for Real World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem solving skills necessary in everyday life Featuring timely research based chapters exploring the broad scope of digital and computer based learning strategies including but not limited to enhanced classroom experiences assessment programs and problem solving training this publication is an essential reference source for academicians researchers professionals and policymakers interested in the practical application of technology based learning for next generation education **Communication and Peace** Julia Hoffmann, Virgil Hawkins,2015-02-11 This book

analyses the use of communication in resolving conflicts with a focus on de escalation and processes of peacebuilding and peace formation From the employment of hate radio in the Rwanda genocide to the current conflict between Russia and the Ukraine following events in the Crimea communication and the media are widely recognized as powerful tools in conflicts and war Although there has been significant academic attention on the relationship between the media conflict and war academic efforts to understand this relationship have tended to focus primarily on the links between communication and conflict rather than on communication and peace In order to make sense of peace it is essential to look at communication in its many facets mediated or not This is true within many of the diverse strands that make up the field of communication and peace but it is also true in the sense that a holistic and interdisciplinary approach is missing from the literature This book

addresses this widely acknowledged lacuna by providing an interdisciplinary perspective on the field bringing together relevant but so far largely isolated streams of research In doing so it aims to provide a platform for further reflection of the meaning of and requirements for peace in our contemporary world with a focus on de escalation conflict transformation reconciliation and processes of peacebuilding as opposed to conflict escalation or crisis intervention This volume will be of much interest to students of peace and conflict studies peacebuilding media and communication studies security studies and IR in general
