Customs Modernization Handbook Luc De Wulf, Jose B. Sokol, 2005-01-03 Trade integration contributes substantially to economic development and poverty alleviation In recent years much progress was made to liberalize the trade regime but customs procedures are often still complex costly and non transparent This situation leads to misallocation of resources Customs Modernization Handbook provides an overview of the key elements of a successful customs modernization strategy and draws lessons from a number of successful customs reforms as well as from customs reform projects that have been undertaken by the World Bank It describes a number of key import procedures that have proved particularly troublesome for customs administrations and traders and provides practical guidelines to enhance their efficiency The Handbook also reviews the appropriate legal framework for customs operations as well as strategies to combat corruption **Customs**

Neoliberal Frontiers Brenda Chalfin, 2010-07-15 In *Neoliberal Frontiers* Brenda Chalfin presents an ethnographic examination of the day to day practices of the officials of Ghana's Customs Service exploring the impact of neoliberal restructuring and integration into the global economy on Ghanaian sovereignty. From the revealing vantage point of the Customs office Chalfin discovers a fascinating inversion of our assumptions about neoliberal transformation: bureaucrats and local functionaries, government offices, checkpoints and registries are typically held to be the targets of reform but Chalfin finds that these figures and sites of authority act as the engine for changes in state sovereignty. Ghana has served as a model of reform for the neoliberal establishment making it an ideal site for Chalfin to explore why the restructuring of a state on the global periphery portends shifts that occur in all corners of the world. At once a foray into international political economy, politics and political anthropology, *Neoliberal Frontiers* is an innovative interdisciplinary leap forward for ethnographic writing as well as an eloquent addition to the literature on postcolonial Africa. **Publications Catalog** World Bank, 2006-07 *Corporate Governance* Samuel O Idowu, Kiymet Tunca Çaliyurt, 2014-04-11 This book brings together a representative collection of perspectives on the way how corporate governance is being aligned with the social responsibility of an organization and the accountability of its management both in large corporations and in medium sized businesses. Examples are given from various industries and branches as well as from different countries and regions across the globe. All examples are commented and explained in detail. Written by a group of selected academic teachers, this book is suitable for adoption as a resource for a case driven approach to teaching Corporate Governance courses at an upper undergraduate or graduate level. *E-development* Robert Schware, 2005 Information and communication technologies (ICTs) are increasingly being recognized as essential tools of development: tools that can empower poor people, enhance skills, increase productivity and improve governance at all levels. The success of ICT enabled development or e development will thus not be measured by the diffusion of technology but by advances in development itself: economic growth and ultimately achievement of the Millennium Development Goals. This volume examines a wide range of issues related to e development with a focus on the requirements and realities of using ICTs to advance development goals. The report does not attempt to present a comprehensive overview of e development. Rather, it highlights key issues that have immediate relevance to policy makers in developing nations who make decisions on investments and development goals. It highlights two issues in particular: e government and e education, because ICT applications in these areas can lead to significant development outcomes and can also be successfully deployed through public private partnerships, leveraging limited government funding to achieve greater impact. *Trade, Doha, and Development* Richard S. Newfarmer, 2006 The role of trade in promoting international development is becoming increasingly important in our globalised world and the global trading system has the potential to help the world's poor if trading inequities can be remedied. This publication examines the key trade issues relevant to the ongoing multilateral trade negotiations and the evolution of the world trading system as a means to address barriers to

growth in developing countries focusing on the Doha Round Issues discussed include potential gains from trade liberalisation for developed and developing countries reforming trade in agriculture as a key to the success of the Doha Round markets for manufacturing and services trade facilitation TRIPs and the regulatory agenda the role of regional trade agreements and issues of aid for trade in order to help low income countries develop the infrastructure needed to participate in the global economy and benefit from new market opportunities

The Many Faces of Corruption J. Edgardo Campos, Sanjay Pradhan, 2007-04-04 Corruption How can policymakers and practitioners better comprehend the many forms and shapes that this social pandemic takes From the delivery of essential drugs the reduction in teacher absenteeism the containment of illegal logging the construction of roads the provision of water and electricity the international trade in oil and gas the conduct of public budgeting and procurement and the management of public revenues corruption shows its many faces *The Many Faces of Corruption* attempts to bring greater clarity to the often murky manifestations of this virulent and debilitating social disease It explores the use of prototype road maps to identify corruption vulnerabilities suggests corresponding warning signals and proposes operationally useful remedial measures in

each of several selected sectors and for a selected sample of cross cutting public sector functions that are particularly prone to corruption and that are critical to sector performance. Numerous technical experts have come together in this effort to develop an operationally useful approach to diagnosing and tackling corruption. *The Many Faces of Corruption* is an invaluable reference for policymakers, practitioners and researchers engaged in the business of development. Finance & Development, 2006. **HMSO Agency Catalogue** Great Britain. Her Majesty's Stationery Office, 2005. *Foreign Affairs*, 2005. **Journal of World Trade Law**, 2008-08. **Trade Preferences and Differential Treatment of Developing Countries** Bernard M. Hoekman, Çağlar Özden, 2006. The issue of SDT has become very topical again following a period during which it was viewed as an outdated concept for the multilateral trading system. We therefore devote attention as well to a number of recent contributions that discuss i) whether there is a continued need for SDT and ii) how this might be designed from both a development recipient objective and from the perspective of the trading system more generally. A major theme of the survey is that most of the issues that are debated today were already being discussed in the 1960s. We conclude that those who questioned the value of unilateral preferences have proven to be prescient. *Supply Chain Perspectives and Issues* Albert Park, Gaurav Nayyar, Patrick Low, 2013. Global value chains (GVCs) have become ubiquitous. The literature that attempts to understand and explain GVCs is vast, multidisciplinary and no less complex than the phenomenon itself. This volume is an ambitious attempt at a fairly comprehensive review of literature on the subject. Customs Guide to the Americas 1997, 1997.
