the calculation of roll force and torque in cold strip rolling - Feb 03 2022

from an approximate theory equations are derived for roll force and torque with and without front and back tensions applied to the strip where tensions are applied the calculations for each pass take about an hour without tensions and with the use of curves given in this paper they can be carried out in ten minutes

a calculation procedure and optimization for pass scheduling - Mar 16 2023

feb 6 2020 this paper provides an overview of pass scheduling and its calculation procedure for rolling forces and bending forces rolling is a process of reducing thickness of work piece by a

the calculation of roll force and torque in hot rolling mills - Jun 19 2023

abstract equations are derived for the normal roll pressure specific roll load and torque in hot rolling mills using the condition for plastic deformation in rolling derived by orowan together with von kármán's equation of equilibrium although applying strictly to the rolling of ideal plastic rigid materials these equations may be

**a rapid calculation method for predicting roll deformation of six** - Dec 13 2022

sep 15 2018 therefore a rapid calculation method for predicting roll deformation of a six high rolling mill was proposed which employed the finite difference method to calculate the roll deflection and used a polynomial to describe the nonlinear relationship between roll flattening and roll contact pressure

*calculating power parameters of rolling mill proquest* - Apr 17 2023

1 introduction rolling mills for the production of steel wire are classified according to the number of mill stand rolls which form the geometry of the deformation zone accordingly these can be categorised by the type of roll groove and the roll transmission path

*load calculation of the most loaded rolling element for a* - Jun 07 2022

oct 3 2020 this paper presents a new model for calculation of load for the most loaded rolling element in a rolling bearing with internal radial clearance the calculation is based on a so called load factor by multiplying this factor by the value of the external radial load the load transferred by the most loaded rolling element of the bearing is obtained

pdf method of load calculation of electrical drives of rolling - May 18 2023

may 1 2018 an improved calculation method for rolling pressure and load torque of electrical drive engine is suggested further this method considers peculiar strain of product in high deformation zones
