Bowen,J.E. Nicholls,1993-06-10 The Z notation has been developed at the Programming Research Group at the Oxford  
University Computing Laboratory and elsewhere for over a decade It is now used by industry as part of the software and  
hardware development process in both Europe and the USA It is currently undergoing BSI standardisation in the UK and has  
been proposed for ISO standardisation internationally In recent years researchers have begun to focus increasingly on the  
development of techniques and tools to encourage the wider application of Z and other formal methods and notations This  
volume contains papers from the Seventh Annual Z User Meeting held in London in December 1992 In contrast to previous  
years the meeting concentrated specifically on industrial applications of Z and a high proportion of the participants came  
from an industrial background The theme is well represented by the four invited papers Three of these discuss ways in which  
formal methods are being introduced and the fourth presents an international survey of industrial applications It also  
provides a reminder of the improvements which are needed to make these methods an accepted part of software  
development In addition the volume contains several submitted papers on the industrial use of Z two of which discuss the key  
area of safety critical applications There are also a number of papers related to the recently completed ZIP project The  
papers cover all the main areas of the project including methods tools and the development of a Z Standard the first publicly  
available version of which was made available at the meeting Finally the volume contains a select Z bibliography and section  
on how to access information on Z through comp specification z the international computer based USENET newsgroup Z  
User Workshop London 1992 provides an important overview of current research into industrial applications of Z and will  
provide invaluable reading for researchers postgraduate students and also potential industrial users of Z     Interface Age,
