Data Complexity in Pattern Recognition Mitra Basu, Tin Kam Ho, 2006-12-22 Machines capable of automatic pattern recognition have many fascinating uses in science engineering as well as in our daily lives Algorithms for supervised classification where one infers a decision boundary from a set of training examples are at the core of this capability This book takes a close view of data complexity its role in shaping the theories techniques in different disciplines asks What is missing from current classification techniques When the automatic classifiers are not perfect is it a deficiency of the algorithms by design or is it a difficulty intrinsic to the classification task How do we know whether we have exploited to the fullest extent the knowledge embedded in the training data Unique in its comprehensive coverage multidisciplinary approach from various methodological practical perspectives researchers practitioners will find this book an insightful reference to learn about current available techniques as well as application areas

Hybrid Artificial Intelligence Systems

Emilio Corchado, Xindong Wu, Erkki Oja, Bruno Baruaque, 2009-06-22 The 4th International Conference on Hybrid Artificial Intelligence Systems HAIS 2009 as the name suggests attracted researchers who are involved in developing and applying symbolic and sub symbolic techniques aimed at the construction of highly robust and reliable problem solving techniques and bringing the most relevant achievements in this field Hybrid intelligent systems have become increasingly popular given their capabilities to handle a broad spectrum of real world complex problems which come with inherent imprecision uncertainty and vagueness high dimensionality and nonstationarity These systems provide us with the opportunity to exploit existing domain knowledge as well as raw data to come up with promising solutions in an effective manner Being truly multidisciplinary the series of HAIS conferences offers an interesting research forum to present and discuss the latest theoretical advances and real world applications in this exciting research field This volume of Lecture Notes in Artificial Intelligence LNAI includes accepted papers presented at HAIS 2009

held at the University of Salamanca Salamanca Spain June 2009 Since its inception the main aim of the HAIS conferences has been to establish a broad and interdisciplinary forum for hybrid artificial intelligence systems and associated learning paradigms which are playing increasingly important roles in a large number of application areas Bio-Inspired Systems: Computational and Ambient Intelligence Joan Cabestany,2009
