Defining Memory Defining Memory:

Defining Memory Amy K. Levin, Joshua G. Adair, 2017-10-20 This updated edition of Defining Memory Local Museums and the Construction of History in America's Changing Communities offers readers multiple lenses for viewing and discussing local institutions. New chapters are included in a section titled Museums Moving Forward which analyzes the ways in which local museums have come to adopt digital technologies in selecting items for exhibitions as well as the complexities of creating institutions devoted to marginalized histories. In addition to the new chapters the second edition updates existing chapters presenting changes to the museums discussed. It features expanded discussions of how local museums treat or ignore racial and ethnic diversity and concludes with a look at how business relationships, political events and the economy affect what is shown and how it is displayed in local museums.

Handbook of Research Methods in Human Memory Hajime Otani, Bennett L. Schwartz, 2018-10-09 The Handbook of Research Methods in Human Memory presents a collection of chapters on methodology used by researchers in investigating human memory. Understanding the basic cognitive function of human memory is critical in a wide variety of fields such as clinical psychology, developmental psychology, education, neuroscience and gerontology and studying memory has become particularly urgent in recent years due to the prominence of a number of neurodegenerative diseases such as Alzheimer's. However, choosing the most appropriate method of research is a daunting task for most scholars. This book explores the methods that are currently available in various areas of human memory research and serves as a reference manual to help guide readers' own research. Each chapter is written by prominent researchers and features cutting edge research on human memory and cognition with topics ranging from basic memory processes to cognitive neuroscience to further applications. The focus here is not on the what but the how. How research is best conducted on human memory.
