**Degrees of Restructuring in Creole Languages** Ingrid Neumann-Holzschuh, Edgar W. Schneider, 2001-02-12 Basic notions in the field of creole studies including the category of creole languages itself have been questioned in recent years Can creoles be defined on structural or on purely sociohistorical grounds Can creolization be understood as a graded process possibly resulting in different degrees of radicalness and intermediate language types semi creoles If so by which linguistic structures are these characterized and by which extralinguistic conditions have they been brought about Which are the linguistic mechanisms underlying processes of restructuring and how did grammaticalization and reanalysis shape the reorganization of linguistic specifically morphosyntactic structures commonly called creolization What is the role of language contact language mixing substrates and superstrates or demographic factors in these processes This volume provides select and revised papers from a 1998 colloquium at the University of Regensburg in which these questions were addressed 19 contributions by renowned scholars discuss structural sociohistorical and theoretical aspects building upon case studies of both Romance based and English oriented creoles This book marks a major step forward in our understanding of the nature of creolization

**Creoles, Their Substrates, and Language Typology** Claire Lefebvre, 2011-01-01 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class

**Language Change in Contact Languages** J. Clancy Clements, Shelome Gooden, 2011 The studies in Language Change in Contact Languages showcase the contributions that the study of contact language varieties make to the understanding of phenomena such as relexification transfer reanalysis grammaticalization prosodic variation and the development of prosodic systems Four of the studies deal with morphosyntactic issues while the other three address questions of prosody The studies include data from the Atlantic creoles Saramaccan Sranan Haitian Creole Jamaican Creole Trinidadian Creole Papiamentu as well as Singapore English This volume originally published as special issue of Studies in Language 33 2 2009 aims to make the work of several language contact experts available to a wider audience The studies will be of use to any student or scholar interested in different approaches to contact induced language processes particularly as they relate to morphosyntax and prosody

## **Contact in Africa and the African Diaspora in the Americas** Cecelia Cutler,Zyjezdana Vrzić,Philipp

Angermeyer,2017-07-12 Language Contact in Africa and the African Diaspora in the Americas brings together the original research of nineteen leading scholars on language contact and pidgin creole genesis In recent decades increasing attention has been paid to the role of historical cultural and demographic factors in language contact situations John Victor Singler s body of work a model of what such a research paradigm should look like strikes a careful balance between sociohistorical and linguistic analysis The case studies in this volume present investigations into the sociohistorical matrix of language contact and critical insights into the sociolinguistic consequences of language contact within Africa and the African Diaspora Additionally they contribute to ongoing debates about pidgin creole genesis and language contact by examining and comparing analyses and linguistic outcomes of particular sociohistorical and cultural contexts and considering less studied factors such as speaker agency and identity in the emergence nativization and stabilization of contact varieties *Complex Processes in New Languages* Enoch Oladé Aboh,Norval Smith,2009 In recent years there has been a new interest in evaluating complex structures in languages The implications of such studies are varied e g the distinction between supposedly more complex and less complex languages how complexity relates to human knowledge of language and the role of the reduction or increase of complexity in language change and creolization This book focuses on the latter issue but the conclusions presented here hold of typological complexity in general The chapters in this book show that the notion of complexity as conceived of in linguistics mainly centres on the outer manifestations of language e g numbers of affixes This exercise is useful in establishing the patterning of languages in terms of their degrees of analyticity or synthesis but it fails to address the properties of the inner rules of these grammars and how these relate to the computational system that governs the human language capacity Put simply issues of complexity should not be equated with the complexity observed in surface patterns of grammars alone *A Handbook of Varieties of English: Morphology and syntax* Edgar Werner Schneider,Bernd Kortmann,2004 The Handbook is by far the most thorough reference work on phonology and the first ever comprehensive overview of the morphology and syntax of varieties of English in the world The Handbook consists of a two volume book accompanied by an interactive CD ROM The genuine speech samples and interactive maps of the CD ROM not only supplement the printed articles by offering lively illustrations of the varieties of English around the world but the material offered can also be used for linguistic research The multimedia material is now also available online Survey Articles The books feature descriptive survey articles that are authored by widely acclaimed specialists in the field and that cover all main national standard varieties distinctive regional ethnic and social varieties major contact varieties as well as major ESL varieties share a common core which makes them invaluable research tools for cross linguistic comparisons provide information on the historical and cultural backgrounds as well as the current sociolinguistic situations in the respective regions serve as state of the art reports on major issues in current research CD ROM The CD ROM not only supplements the

printed volumes through interactive access to the varieties but also provides a comprehensive database with a unique collection of speech recordings of English from around the world sound samples that open new perspectives on the varieties of English as speech recordings also constitute the central aspect of research students as well as professional academics will feel encouraged to use the material for new investigations interactive and synchronized maps that allow either phonological or morphosyntactic grammatical comparisons extensive bibliographies on the relevant research literature links to pertinent websites Online Version The online version provides departments of English and Linguistics with the opportunity to make the multimedia tools simultaneously available to a wider number of faculty members and students instructors can deploy the sound samples and interactive maps to enhance their classroom presentations and to highlight important language features researchers are provided with a database of multimedia material for further study students can employ the data when working on classroom assignments Together the books and the CD ROM are an indispensable reference work and research tool for sociolinguists dialectologists phonologists grammarians typologists and specialists in contact languages and varieties of English around the world Given its accessible style and its rich auditory and visual support this Handbook is also ideally suited not only for professional academics but also for undergraduate and graduate students The editors are responsible for the following topics Kate Burridge Bernd Kortmann Australia Pacific Archipelagos Bernd Kortmann British Isles Morphology and Syntax Rajend Mesthrie Africa South and Southeast Asia Edgar W Schneider The Americas Caribbean Clive Upton British Isles Phonology System requirements for the CD ROM Hardware Pentium 500 MHz or AMD K6 III 500 MHz PowerPC G3 64 MB RAM 16 bit Soundcard Operating Systems Windows 98 NT Me 2000 XP Mac OS 9 x X 10 x Linux any distribution with Kernel 2 0 Supported Browsers Internet Explorer 5 5 or 6 Mac OS Internet Explorer 5 1 Netscape 7 x Mozilla 1 0 Mozilla Firefox 0 8 Plugins Macromedia Flash Player 6 Acrobat Reader A Handbook of Varieties of English Edgar Werner Schneider, Bernd Kortmann, 2004 A reference work on phonology and the first ever comprehensive overview of the morphology and syntax of varieties of English in the world *Linguistics and Language Behavior Abstracts* ,2002
