Michael Spector, 2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning. While using innovative technology to educate individuals is certainly not a new topic, how it is approached, adapted, and used toward the services of achieving real gains in student performance is extremely pertinent. This two volume encyclopedia explores such issues focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices, services, and specific techniques. As technology evolves and becomes even more low cost, easy to use, and more accessible, the education sector will evolve alongside it. For instance, issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia.

Features A collection of 300-350 entries are organized in A to Z fashion in 2 volumes available in a choice of print or electronic formats. Entries authored by key figures in the field conclude with cross references and further readings. A detailed index, the Reader's Guide, themes, and cross references combine for search and browse in the electronic version. This reference encyclopedia is a reliable and precise source on educational technology and a must have reference for all academic libraries Startup Finance 2.0 Sam Ghosh, 2025-08-29 Traditional corporate financial theories and tools are based on matured companies with the assumption that the companies are going concerns. Going Concern refers to the assumption that a company will continue to operate indefinitely with no intention or necessity of liquidation or cessation of operations in the foreseeable future. The problem is that the Going Concern assumption does not hold for startups due to the inherent uncertainty associated with startups. Traditional financial education and resources usually meant for analysts and accountants aren't ideal for entrepreneurs. They focus on analyzing past data from established businesses, not on making forward looking decisions in the uncertain and highly dynamic environment of startups. Entrepreneurs also often struggle to prioritize the allocation of resources between seemingly urgent matters and matters that are important for the long term value of the startup. Thus, this book takes a value oriented approach to startup finance. The book is designed to build the financial intuition that an entrepreneur needs to prioritize matters vital for the long term value of the company, raise capital and allocate capital for value maximization. It also looks at finance from a value creation point of view and covers

specific methods especially suited for startups from investment assessment to valuation to fundraising to managing day to day finances Proceedings of The 11th European Conference on Social Media Susana Pinto,2025-06 The European Conference on Social Media ECSM is a well established academic conference held annually for over a decade with a focus on advancing research and dialogue around social media The primary aim of ECSM is to provide a platform for scholars researchers practitioners and industry professionals to share and discuss their findings on the multifaceted impacts of social media The conference emphasises the importance of understanding how social media influences various sectors including society education business and governance **Congressional Record** United States.
