Ethos, Technology, and AI in Contemporary Society Aaron Hess, Jens E. Kjeldsen, 2024-12-10 Bringing together expert rhetorical theorists and technologists this book explores our current understanding of and attitudes toward ethos credibility and trust in today's changing technological landscape. Recent advancements in technology including the development of digital technologies, the growth of algorithmic machine learning and artificial intelligence and the circulation of disinformation in social media necessitate a reevaluation of ethos. To explore the rhetorical concept of ethos which is the perceived character of a speaker contributors theorize how ethos is enabled, constrained and constituted through new communication technologies. In this edited collection chapters address key philosophical questions concerning the rhetorical capacities of modern communicating machines such as ChatGPT, Midjourney or other digital platforms. Through case studies new theorizing and critical inquiry contributors contemplate the changing relationship between humans and technology in rhetoric and ethos revealing contemporary tensions and insecurities regarding issues including authenticity and authorship. This book will be of interest to students and scholars in the fields of Rhetoric, Communication Studies, Technology Studies, Digital Humanities and Cultural Studies.
