From Text to Understanding Miloš Švaňa, František Zapletal, Miroslav Hudec, 2025-09-26 Social media and other sources of text data are still underutilized resources in public decision making Most public organizations and governmental bodies rely mainly on surveys interviews and other traditional methods for gathering opinions One issue is a lack of easy to use tools for mass text data processing that would enable these organizations to process and understand this type of data This book introduces a novel text data analysis framework designed for public decision making specifically on the level of municipalities The framework combines sentiment analysis with topic modelling and a fuzzy based approach for capturing the diversity in sentiment arising from the fact that different people have different opinions on a given topic The book is recommended for practitioners in public decision making as well as researchers analyzing large amounts of text data in order to understand people's opinions

, 1957. **Youth Digital Health and Online Platforms** Martyna Gliniecka, 2024-12-27. Youth Digital Health and Online Platforms focuses on young people's use of the digital platform Reddit for health. Drawing upon dialogism theory, the book explores how young people produce a youth-led discourse of youth digital health, different from the adult-led framing represented in youth digital health research, policy and service delivery. Peer-led discussions online remain one of the controversial forms of youth digital health, associated with negative peer influence or casual teenage talk. This book argues that online peer-led dialogues support young people's agency in health and that young people can benefit from dealing with health issues with peers. The work is based on the digital ethnography of teenagers' subreddits on Reddit and utilises a theoretical framework of dialogism, a linguistic-based theory originated by an early 20th century Russian philosopher, Mikhail Bakhtin. The book introduces the concept of dialogical youth-led youth digital health discourse, formed in the peer-led space of Reddit. This youth-led discourse celebrates equality and diversity amongst people's meanings and opinions. It is constructed around three relational elements: socio-material affordances, creative practices and a plurality of youth voices. Reddit's pseudonymous, anti-authoritarian and egalitarian nature supports the emergence of this youth-led discourse. The book can

Optimists used to suggest that the anonymity of the internet allows people to interact without prejudices about race sex or age Although some websites still foster anonymous communication their popularity pales in comparison with sites like Facebook that foreground identifying characteristics These social network sites claim to enrich their users lives by cultivating connections but they sometimes have the opposite effect Given the widespread and growing use of social media my research poses the following questions Does a particular form of dis engagement with the world flow from the reduction of the person to a profile Does this dis engagement extend beyond social media possibly into the way that we understand the world as such What can we conclude about the broader theoretical framework in which an analysis of social media might be couched I answer these questions through Martin Heidegger s work which provides the theoretical orientation for the dissertation as a whole Noting that history informs the way that he understands ontology Chapter One I argue that the social changes that are accompanying the spread of the internet suggest modifications to his characterizations of boredom Chapter Two and technology Chapter Three I then turn to three emblematic social media sites Facebook which renders its users connected and identifiable Chapter Four Reddit which gathers its users into a pseudonymous community of common interest Chapter Five and 4chan which demands that its users engage in an anonymous fashion Chapter Six and analyze them using the framework developed above while drawing from them to alter that framework further I claim that although the patterns of use apparent on these sites differ they all express different aspects of the mood that holds sway over the internet Social media is both the cause of and solution to boredom and it is shaping a generalized mood that is coming to seem ontological in its purchase
