Care Uncertainty And Intergenerational:

Care, Uncertainty and Intergenerational Ethics C. Groves, 2014-12-02 Our capacity to reshape the future has never been more powerful Yet our ability to foresee the consequences of what we do has not kept pace Is the idea that we have responsibilities to future generations therefore meaningful This book argues that it is with the aid of a unique reading of the care ethics tradition

Justice, Care, and Value Thomas Randall, 2023-07-21 In *Justice Care and Value* Thomas Randall argues for the radical potential of care ethics as a distinct and preferable theory of distributive justice Advancing the feminist literature this book defends a vision of society that can best enable caring relations to flourish Specifically Randall proposes a values driven theory of care ethics that derives normative criteria for evaluating the moral worth of caring relations and their surrounding institutions via a classification of the values of care They argue that such a theory gives us unique and meaningful solutions to contemporary questions of distributive justice across personal political global and intergenerational domains In doing so the book makes significant strides to engage care ethics with the broader moral and political philosophy literature Topical and interdisciplinary Randall demonstrates that care ethics has the conceptual resources to ground distributive theories of socialism territorial and natural resource rights obligations to future generations and historic redress The book will be of great interest to academics researchers and students of feminist philosophy but also of liberalism political economy and theories of global and intergenerational justice

Climate Change and the Contemporary Novel Adeline Johns-Putra, 2019-03-21 Analysing how contemporary fiction explores climate change Johns Putra argues that literature can help us understand our obligations to the future

Care Across Generations Kristin E. Yarris, 2017-08-29 Global inequalities make it difficult for parents in developing nations to provide for their children Some determine that migration in search of higher wages is their only hope Many studies have looked at how migration transforms the child parent relationship But what happens to other generational relationships when mothers migrate *Care Across Generations* takes a close look at grandmother care in Nicaraguan transnational families examining both the structural and gendered inequalities that motivate migration and caregiving as well as the cultural values that sustain intergenerational care Kristin E Yarris broadens the transnational migrant story beyond the parent child relationship situating care across generations and embedded within the kin networks in sending countries Rather than casting the consequences of women's migration in migrant sending countries solely in terms of a care deficit Yarris shows how intergenerational reconfigurations of care serve as a resource for the wellbeing of children and other family members who stay behind after transnational migration Moving our perspective across borders and over generations *Care Across Generations* shows the social and moral value of intergenerational care for contemporary transnational families

Analyses on Health Status and Care Needs among Older Adults Jian Sun, Hongye Luo, Yi Zeng, 2025-09-12 Globally a shift in population structures and disease spectrum is inevitable The latest global burden of disease study revealed that the average healthy life expectancy has steadily increased from 1990 to 2019

worldwide However there is a concerning trend in which the growth in healthy life expectancy is lower than the growth in life expectancy in 198 out of 204 countries evaluated This implies that people spend more time in sub optimal health despite living longer Moreover non communicable diseases contribute an increasingly significant portion of the disease burden in low and middle income countries growing from one third to almost two thirds from 1990 to 2019 This mainly results from preventable risk factors It is important to approach aging with a positive outlook This entails guaranteeing sufficient medical care and proactively managing health issues in older adults Importantly since several diseases are often irreversible prevention is key Social and psychological factors due to their nebulous harm have struggled to gain attention over a long period We should aim to make the additional years gained during old age as healthful as those in other life stages
