Schoolwide Action Research for Professional Learning Communities Karl H. Clauzet, Dale W. Lick, Carlene U. Murphy, 2008-05-15 Clearly shows the success that can occur when a staff learns together. I highly recommend this book to aspiring and beginning principals as well as those with years of experience. Paul Young, Executive Director, West After School Center, Former President, National Association of Elementary School Principals. Foster schoolwide professional learning through a collaborative action research model. Action research is a popular method for individual educators to examine their practices and grow in their profession. In this how-to guide, readers will learn how Whole Faculty Study Groups (WFSGs) use action research to involve an entire school in advancing staff learning and school performance. The WFSG model is a type of professional learning community (PLC) that catalyzes school change with schoolwide action research as a central component. With over 20 years of experience, the authors draw from hundreds of examples and case studies to describe how implementing WFSGs can help students, teachers, administrators, and other staff members work collaboratively to improve teacher practice and student learning. The authors' empirical data and comprehensive approach help deepen educators' understanding of how to use meaningful action research to strengthen teamwork and realize school reform. Additionally, readers will learn how the WFSG system compares with other approaches to action research. The schoolwide action research

process can be applied in a wide variety of school reform efforts Study groups can move from discussion to action Principals and district leaders can support schoolwide action research Discover the ways WFSGs can enhance student learning and result in real school improvement in this highly relevant must have guide [Math Know-How](#) Thomasenia Lott

The move to Common Core State Math Standards represents two significant transitions for teachers and students. First the new standards identify rigorous mathematics content that often exceeds previous expectations. Second the vision for the Common Core encompasses a series of Mathematical Practices that include skills, processes, and attitudes that can only be developed through extensive experience with skillfully facilitated problem solving and effective discourse. To facilitate these TRANSITIONS Walch Education has developed this collection of problem solving tasks that target the new content and embody the new practices. Request a free task. These 9 tasks will help you to infuse existing curriculum with both the content and the practices of the Common Core and support problem based teaching and learning. Each task takes only 20-30 minutes for students to complete with another 10-20 minute debrief to enhance reasoning and communication and to crystallize understanding. For the teacher background information and implementation suggestions links to relevant resources, content and research, a series of suggested questions to encourage problem solving, reflection and discourse guiding rather than leading students. For the students a meaningful context that may transcend traditional school subjects, opportunity to collaborate and to grapple with real problem solving.
