Discrete-Trials Teaching With Children With Autism Daniela Fazzio, PhD, BCBA-D, Garry L. Martin, 2011-11-01

Discrete trials teaching or DTT is a very important teaching technique developed by behavior analysts. The DTT Manual has taught numerous groups of individuals to conduct DTT with children with autism in as quickly as 6 hours. The manual is the product of the joint work of Dr. Daniela Fazzio, PhD, BCBA-D and Dr. Garry L. Martin, PhD, Distinguished Professor of Psychology. The manual addresses an area of much need in the field of autism treatment: effective and efficient training for parents and professionals. It was written with them in mind and it has been empirically tested several times with several university students, paraprofessionals, and parents. It will be easy to navigate for individuals with a high school diploma regardless of any prior experience in psychology or special education.
