Computer Control of Machines and Processes John G. Bollinger, 1988      **Computer Control of Machines and Processes** John G. Bollinger, Neil A. Duffie, 1989-01-01      *Mechatronic Systems and Process Automation* Patrick O.J. Kaltjob, 2018-03-09 The book discusses the concept of process automation and mechatronic system design while offering a unified approach and methodology for the modeling analysis automation and control networking monitoring and sensing of various machines and processes from single electrical driven machines to large scale industrial process operations This step by step guide covers design applications from various engineering disciplines mechanical chemical electrical computer biomedical through real life mechatronics problems and industrial automation case studies with topics such as manufacturing power grid cement production wind generator oil refining incubator etc Provides step by step procedures for the modeling analysis control and automation networking monitoring and sensing of single electrical driven machines to large scale industrial process operations Presents model based theory and practice guidelines for mechatronics system and process automation design Includes worked examples in every chapter and numerous end of chapter real life exercises problems and case studies      *Computer Control in Manufacturing Industries* Jacob Sonny, 1979      **Advanced Cutting Tool Technology and Machine Processes** Riyadh A. Al-Samarai, Yarub Al-Douri, 2025-09-22 Today s industry heavily relies on advanced cutting tool technology and manufacturing techniques to enhance quality and efficiency in production This undergraduate level textbook is dedicated to exploring the latest developments that enhance tool performance lower costs and boost productivity The mission of this textbook is to provide readers with a thorough understanding of cutting edge technologies and methods used in cutting tools and industrial processes Advanced Cutting Tool Technology and Machine Processes steps into the world of modern cutting tools used in the metallurgical industry Each tool is meticulously dissected showcasing its distinctive features and methods of operation The text explores advanced metal cutting and processing techniques including laser water and plasma cutting By covering these cutting edge methods students and professionals can remain at the forefront of industry advancements In addition to detailed tool descriptions this textbook offers practical guidance on utilizing tools effectively and safely as well as tips on tool maintenance to ensure longevity and peak performance To enhance comprehension this textbook incorporates exercise problems case studies and practical examples that illustrate how theoretical knowledge is applied in real world scenarios This hands on approach aids in the development of problem solving skills and the practical application of concepts Lastly this textbook provides comprehensive information on the properties of various metals and how to handle them effectively This knowledge is crucial in selecting the appropriate tools for each type of metal guaranteeing precision and efficiency in cutting processes This textbook is ideal for undergraduate students in production materials industrial mechatronics marine mechanical and manufacturing engineering programs and is also useful for graduate programs related to higher level machining topics as well as professional engineers and technicians Figure
