Aspects of Personal Privacy in Communications - Problems, Technology and Solutions Geir M. Koen, Vladimir a. Oleshchuk, 2025-01-13 The modern society is rapidly becoming a fully digital society. This has many benefits but unfortunately it also means that personal privacy is threatened. The threat does not so much come from a 1984 style Big Brother but rather from a set of smaller big brothers. The small big brothers are companies that we interact with, they are public services and institutions. Many of these little big brothers are indeed also being invited to our private data by ourselves. Privacy as a subject can be problematic. At the extreme, it is personal freedom against safety and security. We shall not take a political stand on personal privacy and what level of personal freedom and privacy is the correct one. Aspects of Personal Privacy in Communications is mostly about understanding what privacy is and some of the technologies may help us to regain a bit of privacy. We discuss what privacy is about, what the different aspects of privacy may be and why privacy needs to be there by default. There are boundaries between personal privacy and societal requirements and inevitably society will set limits to our privacy. Lawful Interception etc. There are technologies that are specifically designed to help us regain some digital privacy. These are commonly known as Privacy Enhancing Technologies (PETs). We investigate some of these PETs including MIX networks, Onion Routing and various privacy preserving methods. Other aspects include identity and location privacy in cellular systems, privacy in RFID, Internet of Things (IoT) and sensor networks amongst others. Some aspects of cloud systems are also covered.

*Whitaker's Cumulative Book List*, 1984. **RF Positioning: Fundamentals, Applications, and Tools** Rafael Saraiva Campos, Lisandro Lovisolo, 2015-07-01. This new resource presents a comprehensive view of radio frequency (RF) positioning. The book is organized to allow readers to progress at a fast pace from the fundamentals of RF positioning to the use of advanced tools such as artificial intelligence algorithms and application development environments. The first part of the book covers the fundamentals of RF localization. The second part addresses the application of those fundamentals in several types of wireless networks and technologies as Cellular Networks, Wi-Fi, Bluetooth, Sensor Networks, Ultra Wide Band and Global Navigation Satellite Systems. The third part brings several tools to allow rapid development of positioning applications for mobile devices as well as to support implementation, usage, deployment and research of localization algorithms. This book presents numerous MATLAB examples accompanied by the corresponding MATLAB code made

available at the book website The MATLAB code to most figures is also provided as well as databases of measurements collected during experiments conducted both in cellular and Wi Fi networks The book also is accompanied by Android source codes of the example apps developed in Chapter 10
