Concise Clinical Pharmacology

Concise Clinical Pharmacology Ben Greenstein, Adam Greenstein, 2007 This textbook provides a concise and thorough introduction to clinical appraisal pharmacology from which students can gain a rapid understanding of individual topics within the discipline and from which they can review and revise certain topics before exams. This is achieved through self-contained topics with concise text on the left and a diagram on the right to elaborate and reinforce the text. The text has a strong clinical focus and in the main sections will relate to particular body systems or the therapy of a disease class eg cancer. Pharmacological principles and mechanisms are covered but the main focus is on the therapeutic use of the drugs. Sections will cover basic principles of pharmacology, specialized pharmacology, complementary pharmacology and the vitamins. The text will be written primarily for pharmacy students but will also be of interest to clinical medical students. The strong clinical focus should also appeal to practitioners. **Concise Clinical Pharmacology** Raymond Hohl, 2008-03 Useful for cancer therapeutics for real world patient care this book serves as a resource on the clinical use of anti cancer medicines. Oriented towards everyday patient care it details what drug to use when to use it and how the drug metabolizes. It places special emphasis on interactions with other non cancer medications. **Cns Therapeutics** John P. Blass, 2007 Delivers expert guidance to the clinical pharmacology of modern CNS Central Nervous System medicines. Organized according to both therapeutic agent and clinical disorder. Includes patient safety information on common pitfalls and errors in prescribing.

Pharmacology for Health Professionals Kathleen Knights, Andrew Rowland, Shaunagh Darroch, Mary Bushell, 2022-12-15 If you are worried that studying pharmacology will be difficult to apply to clinical practice. **Pharmacology for Health Professionals** is the book for you. Written by experienced health professional educators this textbook brings the study of drugs and medicines to life. This title is considered the most authoritative text in Australia and New Zealand for nursing and allied health students but it is also highly accessible. The use of easily flowing material integration with physiology and pathophysiology and focus on clinically relevant information clearly show how pharmacology concepts can be applied in practice. Fully updated in its sixth edition the book will help students master this complex and constantly changing area of their studies and is suitable for use in many undergraduate health professional courses including nursing, paramedicine, pharmacy, podiatry, optometry, midwifery, speech pathology and general biomedical health science programs. Focus on clinical application of pharmacology through review exercises, clinical focus boxes and prescribing considerations. Critical thinking scenarios in each chapter reinforce pharmacological concepts and clinical application. Humanoid models illustrate pharmacological or adverse effects of drugs. Contextualised for Australian and New Zealand students. Includes life span, gender, cultural considerations where relevant. Comprehensive Drugs at a Glance table in each chapter. **Introduction to Clinical Pharmacology** Marilyn W. Edmunds, 2006 Now featuring a full color design and illustrations this popular textbook combines a clear and concise format with up to date coverage of nursing pharmacology. It provides a clear review of

mathematics with drug calculations and a concise overview of the general principles of pharmacology. Each therapeutic drug class is covered in a straightforward format including an application of the nursing process and consistent learning aids. Its coverage of essential pharmacology content and its clear consistent approach will help students succeed in nursing pharmacology and excel on the NCLEX Examination which now includes an increased emphasis on pharmacology. Application of the nursing process and patient teaching for each therapeutic drug class with coverage of Assessment Diagnosis Planning Implementation Evaluation and Patient and Family Teaching Drug tables within the discussion of each therapeutic drug class provide a clear and consistent reference to individual drug dosage information with a special symbol for drugs available only in Canada. A comprehensive unit three chapters on mathematics and drug calculations to ensure mastery of math skills needed for safe medication administration. Step by step Procedure boxes in the medication administration chapter provide students with clear instructions and illustrations for various routes of drug administration. Highlights the Top 50 Drugs most often prescribed in the U.S. New chapters on Patient Teaching and Health Literacy Chapter 2 and Medications for Pain Management Chapter 17 equip students for the realities of nursing practice. Now printed in full color. Readability is enhanced throughout with a special emphasis on health literacy. Drug Calculation Review questions at the ends of select chapters provide practice in calculating drug dosages using a variety of approaches including dimensional analysis. Complementary and Alternative Therapies boxes highlight special considerations for herbal therapies including drug interactions. Fully implements the JCAHO recommendations for the use of abbreviations. A companion CD ROM packaged in each textbook reinforces content with interactive NCLEX examination style review questions an Audio Glossary animations video clips and a drug dosage calculator.

Instant Clinical Pharmacology Evan J. Begg, 2002-12-23 Instant Clinical Pharmacology is a short introductory text which explains the principles behind the prescribing process. The book provides essential information about the core topics in clinical pharmacology and bridges the gap between basic pharmacology and the therapeutic use of drugs. Written for the busy medical student and junior doctor the book provides the reader with a quick resource for understanding the principles of drug action and interaction and the use of drugs in clinical practice. The book has been designed for ease of use and is organised into short modules. As with other titles in the Instant Series the accessible style of one topic per page is used accompanied by clear illustrations. Instant Clinical Pharmacology is ideal for medical students requiring a quick overview of the topic or for review when preparing for examinations.
